

## △ PREFACE

The Member airlines of the International Air Transport Association (IATA) and the Airlines for America (A4A) have developed the Standard IATA/A4A Cargo Interchange Message Procedures (Cargo-IMP).

The purpose of this Manual is to enable communication which will ensure uniformity, understanding, accuracy and economy. The Manual is published as Attachment 'A' to IATA Resolution 670.

- △ The 34th Edition of the IATA Cargo Interchange Message Procedures Manual becomes effective on 1 January 2015 and replaces the previous 33rd Edition.
- As per the IATA Cargo Services Conference (CSC), there will be no further changes to Cargo-IMP Messages and the Cargo-IMP 34th edition is the last and final edition. From now on, any future changes in the messages will only be conducted in the Cargo-XML standards that are available in the IATA Cargo-XML Manual and Toolkit.
- △ Users are advised that the Cargo-IMP functionality is improved by allowing exchange of ASCII 7 bit characters.
- △ Users are further advised that additional editorial corrections have been made to the Status Answer (FSA) and the Status Update (FSU) messages.

These procedures are consistent with the requirements of the IATA Systems and Communications Reference Manuals as they relate to technical communications procedures, and with IATA and A4A Cargo Resolutions, as they relate to cargo processes.

Source Documents take precedence over codes published in this Manual.

Messages in the Cargo-IMP format will be accepted by both IATA Members and A4A Members.

Proposals for new messages or amendments to existing messages published in the Cargo-IMP Manual shall be submitted to the Cargo Business Processes Panel (CBPP), on the standard form which is Attachment '[A](#)' of Resolution 671 and is included with this Preface.

The grey shaded background indicates amendments that have not yet been declared effective at time of production. They are awaiting the necessary government approvals.

Any comments concerning the content of the Manual would be appreciated. Users of the Manual are invited to contact (YMQFPXB or [cargoedi@iata.org](mailto:cargoedi@iata.org)) for any technical assistance required in the implementation and use of these messages.

## REFERENCE MARKS

The following symbols placed against an item indicate changes from the previous edition.

## Symbol Meaning

- ☐ Addition of a new item.
- Change to an item.
- ☒ Cancellation of an item.

## RESOLUTION 671 — Attachment 'A' — CARGO EDI MESSAGE REQUEST FORM

The form is titled "Cargo EDI Message Request Form" and is part of the "Cargo Interchange Message Procedures Manual". It contains several sections for data entry, including "Requester Information", "Message Details", "Message Content", and "Comments". The form is designed to be filled out by a user requesting a message.

[Open PDF Form](#)

## CARGO EDI DATA REQUIREMENTS FORM

The form is titled "Cargo EDI Data Requirements Form" and is part of the "Cargo Interchange Message Procedures Manual". It contains a table with columns for "Data Element", "Data Type", "Data Length", "Data Format", "Data Source", and "Data Destination". The table is designed to be filled out by a user specifying the requirements for a message.

[Open PDF Form](#)

## EXAMPLE OF CARGO EDI DATA REQUIREMENTS FORM

**Data** — enter the Data ID, or range of Data IDs, of the data group(s) or data element(s) that can be repeated;

**Times** — enter the number of times the data can be repeated. If unlimited occurrences are allowed, enter “U”;

**Within** — for data repetition within a data group or within another data repetition range, enter the Data ID, or range of Data IDs, of the data group(s).

## **GENERAL INFORMATION**

### **1. FUNCTION OF CARGO-IMP MESSAGES**

The Cargo-IMP messages have been developed by the Member Airlines of the International Air Transport Association (IATA) and the Airlines for America (A4A) as Standard IATA/A4A Cargo Interchange Message Procedures. The purpose of these messages is to ensure uniformity, mutual understanding, accuracy and economy in inter-airline data exchange and in data exchange between airlines and other air cargo industry participants including agents, brokers and Customs. The messages are used in both manual and computerized environments.

The messages are consistent with the A4A/IATA Cargo Resolutions as they relate to Cargo Procedures.

- ☐ Note: IATA has now developed and published the Cargo-XML Messages. For further details visit IATA Cargo-XML webpage at [www.iata.org/Cargo-XML](http://www.iata.org/Cargo-XML).

### **2. TERMINOLOGY**

For the purposes of this Manual the following terminology will be used:

#### **2.1 Transmission**

A transmission consists of the data (information) that is interchanged at one time between parties.

#### **2.2 Message**

A message is the lowest unit of complete information that may be exchanged between an originator and a recipient for a predefined purpose.

#### **2.3 Standard Message Identifier (SMI)**

An SMI is an approved three-letter code which is used to uniquely identify a given type of message. It must always be shown at the beginning of a Standard Message Text and appears separately on the first line after the address envelope.

#### **2.4 Standard Message Text (SMT)**

A Standard Message Text (SMT) contains the information required for a predefined purpose. It is composed of a number of related text elements structured according to agreed standards. The sequence in which elements are grouped is determined by the logical progression required for computer processing as well as manual reading.

#### **2.5 Text Element**

A text element is a basic unit for the transmission of data and is composed of a group of related data elements.

## **2.6 Text Element Identifier (Line Identifier)**

A three-letter identifier used at the beginning of a line to indicate that certain data elements will follow.

## **2.7 Data Group**

A data group consists of either one or several data elements with or without separators. It shows the interdependence of data within a text element and allows the group to be shown as optional, conditional or mandatory.

## **2.8 Data Element (Simple and Composite)**

A data element is an item of information that has been uniquely identified for the interchange of data. A data element may be either a Simple or a Composite Data Element.

Simple Data Element — One unit of data, providing a single concept, e.g. Month MAR.

Composite Data Element — A combination of more than one unit of data, providing a broad concept, e.g. Full Date DDMMYY 12MAR85.

## **2.9 Data Element Identifier**

A one, two, three or four-letter identifier used to identify the Data Element which follows.

## **2.10 Optional**

The Text Element/Data Group/Data Element may be included at the option of the sender or by agreement between sender and recipient.

## **2.11 Conditional**

The Text Element/Data Group/Data Element is required dependent upon a stated condition.

## **2.12 Mandatory**

The Text Element/Data Group/Data Element must be included.

## **2.13 Separator Character**

A special character which serves as a separator between Data Elements/Data Groups/Text Elements.

## **2.14 Syntax Rules**

The agreed rules governing the structure of a transmission.

## **3. TRANSMISSION OF CARGO-IMP MESSAGES**

### **3.1 Various Applications for Message Utilisation**

A Cargo-IMP Message may be utilised in the following ways:

#### **3.1.1 Computer-to-Computer**

The Cargo-IMP Message is automatically constructed and generated by the sending party and will be automatically processed by the receiving party.

#### **3.1.2 Manual-to-Computer**

The Cargo-IMP Message is manually constructed and generated by the sending party and will be automatically processed by the receiving party.

#### **3.1.3 Computer-to-Manual**

The Cargo-IMP Message is automatically constructed and generated by the sending party and will be manually processed by the receiving party.

#### **3.1.4 Manual-to-Manual**

The Cargo-IMP Message is manually constructed and generated by the sending party and will be manually processed by the receiving party.

## **4. DESCRIPTION OF CARGO-IMP MESSAGES — SYNTAX RULES**

### **4.1 Composition of Cargo-IMP Messages**

A Cargo-IMP Message is composed of a Message Address, a Standard Message Identifier (SMI) and a Standard Message Text (SMT). The Standard Message Identifier is shown separately on the first line of the Cargo-IMP Message.

The structure of Cargo-IMP Messages is such that they can be easily prepared and read in both manual and computerized environments.

Cargo-IMP Messages are constructed with due regard to transmission costs and therefore the number of characters is kept to a minimum.

### **4.2 Description of Cargo-IMP Messages**

The message descriptions/specifications contained in the message chapters of this manual detail the SMI and the sequential order of data elements that form a Standard Message Text (SMT). The sequential order is determined by the logical progression of elements required for computer processing and also the requirements of manual reading.

### **△ 4.3 Character Set**

Cargo-IMP Messages published in Cargo-IMP Manual 32nd edition and above (including FWB version 16) can use ASCII 7 bit (Table [4.3.1](#)) characters while

messages published in lower editions of the Cargo-IMP Manual can continue using the limited characters.

Cargo-IMP Messages published in Cargo-IMP Manual 31st edition and lower (except FWB version 16) can only contain the following approved characters:

- the letters A to Z (upper case only)
- the numerals 0 to 9
- the special characters / - . Space < =

#### □ 4.3.1 ASCII 7 bit Character Set (Printable Values)

| Decimal | Value  | Description                                      |
|---------|--------|--------------------------------------------------|
| 032     | SP     | (Space)                                          |
| 033     | !      | (exclamation mark)                               |
| 034     | "      | (double quote)                                   |
| 035     | #      | (number sign)                                    |
| 036     | \$     | (dollar sign)                                    |
| 037     | %      | (percent)                                        |
| 038     | &      | (ampersand)                                      |
| 039     | '      | (single quote)                                   |
| 040     | (      | (left/opening parenthesis)                       |
| 041     | )      | (right/closing parenthesis)                      |
| 042     | *      | (asterisk)                                       |
| 043     | +      | (plus)                                           |
| 044     | ,      | (comma)                                          |
| 045     | -      | (minus or dash)                                  |
| 046     | .      | (dot)                                            |
| 047     | /      | (forward slash) Note: This is reserved character |
| 048-057 | 0 to 9 |                                                  |
| 058     | :      | (colon)                                          |
| 059     | ;      | (semi-colon)                                     |
| 060     | <      | (less than)                                      |
| 061     | =      | (equal sign)                                     |
| 062     | >      | (greater than)                                   |
| 063     | ?      | (question mark)                                  |
| 064     | @      | (AT symbol)                                      |
| 065-090 | A to Z |                                                  |
| 091     | [      | (left/opening bracket)                           |

|         |        |                                           |
|---------|--------|-------------------------------------------|
| 092     | \      | (back slash)                              |
| 093     | ]      | (right/closing bracket)                   |
| 094     | ^      | (caret/circumflex)                        |
| 095     | _      | (underscore)                              |
| 096     | `      | (grave accent)                            |
| 097-122 | a to z |                                           |
| 123     | {      | (left/opening brace)                      |
| 124     |        | (vertical bar)                            |
| 125     | }      | (right/closing brace)                     |
| 126     | ~      | (tilde)                                   |
| 127     | DEL    | (delete) Note: This is reserved character |

---

#### 4.4 Separator Characters

Some of the approved characters are used for specific functions within the message.

The slant (/) is used as an element separator. The slant is also used as the first character position on a line to indicate that the data which follows is a continuation of related data in the preceding line, i.e. the data has only been entered on a separate line because of the line length constraints.

The hyphen (-) is used as a sub-element separator.

The full stop (.) is used as a decimal point within data elements.

The carriage return line feed (<=) is used to separate lines of information. Where possible, a “line” contains a complete logical group of information.

#### △ 4.5 Element Character Format

Standardised symbols are used in the message description to describe character formats. The symbols and their meaning are detailed below:

- a represents a single alphabetic character;
- n represents a single numeric character;
- m represents only mixed alpha (characters A through Z) and figures (numerals 0 through 9);
- △ t represents a character in free form text (alphabetic, numeric, hyphen, full stop or space) for Cargo-IMP Manual 31st edition and lower (excluding FWB version 16); represents ASCII characters (see [4.3.1](#)) for Cargo-IMP Manual 32nd edition and above (including FWB version 16);
- < indicates a Carriage Return;
- = indicates a Line Feed onto the next line.

The following indicators are used in conjunction with the above symbols:

- [ ] brackets framing symbols indicate the optional status of the characters, e.g. [aa] represents 2 optional alphabetic characters;
- [N] indicates a number N of characters or group of characters; e.g. a[N] represents a number N of alphabetic characters, aaa[N] represents a number N of the group of 3 alphabetic character;
- [...N] indicates a number of characters or group of characters up to and including a number N;
- [M...N] indicates a number of characters or group of characters where M is the lower limit and N is the upper limit inclusively;
- n indicates a 12 numeric element which could include a decimal point.
- p

#### 4.6 Identification within a Cargo-IMP Message

Data within a Cargo-IMP message is identified in one of two ways:

- (a) Implicitly — by position in a fixed sequence;
- (b) Explicitly — by use of a Data Element or Text Element Identifier (Line Identifier).

Data Element Identifiers consist of one or more characters.

Text Element Identifiers (Line Identifiers) consist of three characters and identify a single line or the first line in a sequence of lines. These identifiers are always followed by a separator (/).

#### 4.7 Specification of Content of a Cargo-IMP Message

For the purpose of this manual the following symbols are used to define the status of the Element:

- O — Optional (see [2.10](#))
- C — Conditional (see [2.11](#))
- M — Mandatory (see [2.12](#)).

The elements in the message are grouped by levels where:

- Level 1 is the Text Element Level
- Level 2 is the Data Group Level
- Level 3 is the Data Element Level.

Each element is allocated a numeric reference within the Cargo-IMP Message. For example, a ULD Description might be:

|       |                                    |         |
|-------|------------------------------------|---------|
| 4.    | ULD Description                    | Level 1 |
| 4.1   | Total Number of ULDs               | Level 2 |
| 4.2   | ULD Identification                 | Level 2 |
| 4.2.1 | ULD Type                           | Level 3 |
| 4.2.2 | ULD Serial Number                  | Level 3 |
| 4.2.3 | ULD Owner Code                     | Level 3 |
| 4.3   | ULD Position Restriction Indicator | Level 2 |
| 4.4   | Weight of ULD                      | Level 2 |
| 4.4.1 | Weight Code                        | Level 3 |
| 4.4.2 | Weight                             | Level 3 |

#### 4.8 Length of a Cargo-IMP Message

A Cargo-IMP Message is restricted to a maximum of 3500 characters.

Each line within a Cargo-IMP Message is restricted to a maximum of 69 characters.

#### 4.9 Split of a Cargo-IMP Message

If a message is longer than 3500 characters, the method used to split the message text is dependent on the Message Identifier.

##### 4.9.1 Method 1

For Airline Flight Manifest (FFM), Booking List (FBL) and Declaration for Dangerous Goods Data (FDD) Messages the following method is used:

First Part:

- (a) the first line of the Standard Message Text (SMT) must contain sequence number: 1
- (b) the Standard Message Text (SMT) must terminate with the line: CONT < =

Following Parts:

- (a) the first line of the Standard Message Text (SMT) must contain the next sequential number: N
- (b) the Standard Message Text (SMT) must terminate with the line:
  - either CONT < = if other part to follow
  - or LAST < = if the last part

##### **Note:**

*If the message has only 1 part, the SMT terminates with the line: LAST < =*

##### 4.9.2 Method 2

For all other messages, the following method is used:

PART/1/CONT &lt;=

**(a)** must commence with the SMI plus the first line of the Standard Message Text (SMT)

- either PART/N/CONT < =
- if other part to follow
- or PART/N/LAST < =
- if the last part

The diagram illustrates the structure of a 1250 message, which is a 10-character alphanumeric string. The fields are defined as follows:

- STANDARD MESSAGE IDENTIFIER:** The first 3 characters (positions 1-3). In the example, it is "FSA".
- REFERENCE NUMBER:** The next 2 characters (positions 4-5). In the example, it is "12".
- LINE IDENTIFIER:** The next 2 characters (positions 6-7). In the example, it is "11".
- CONTINUATION OF PREVIOUS LINE:** The final 3 characters (positions 8-10). In the example, it is "DLV".

The diagram also shows the internal structure of the message fields:

- STANDARD MESSAGE IDENTIFIER:** A 3-character field.
- REFERENCE NUMBER:** A 2-character field.
- LINE IDENTIFIER:** A 2-character field.
- CONTINUATION OF PREVIOUS LINE:** A 3-character field.

The diagram also shows the internal structure of the message fields:

- STANDARD MESSAGE IDENTIFIER:** A 3-character field.
- REFERENCE NUMBER:** A 2-character field.
- LINE IDENTIFIER:** A 2-character field.
- CONTINUATION OF PREVIOUS LINE:** A 3-character field.

There are two special text elements which occur in several Cargo-IMP Messages. These text elements commence with a text element identifier (SSR or OSI) followed by a separator (/) and terminate with a CRLF (=). These text elements are:

**(a) SSR** — Special Service Request (special manual action required message will have to be routed for manual processing);

- (b) OSI — Other Service Information (can simply be stored as remarks — message does not have to be routed for any special action).

## **6. VALIDATION OF A CARGO-IMP MESSAGE**

### **6.1 Validation of Data to be Built into a Cargo-IMP Message**

In a computer environment validation checks according to the Resolutions and/or Recommended Practices published in the IATA Cargo Services Conference Resolutions Manual should be applied prior to building data into a Cargo-IMP message.

### **6.2 Validation of the Structure of a Cargo-IMP Message**

Before a message is transmitted, certain validation routines are performed on the message in order to minimize the possible errors in message composition. The validation routines include:

- (a) verification of the length of the message;
- (b) verification of the length of each line in the message;
- (c) verification of the characters used in the message.

#### **6.2.1 Validation of Repeated Data**

Within the message specifications there is sometimes an allowance for data to be repeated. Unless the number of occurrences is specified, e.g. Can occur a maximum of three times, the number of repeats is unlimited but must adhere to the following:

- △ (a) the maximum 69 characters per line and 3500 characters per message as specified in [4.8](#);
- (b) a specific note limiting the total number of characters within the data group or reference line.

## **7. RETRANSMITTAL OF A MESSAGE**

When a receiving station requests that a message be retransmitted, the retransmitted message text may start with the code “PDM” followed by a Carriage Return Line Feed.

When a sender or sending system retransmits a message because of a lack of confirmation of receipt, the retransmitted message text must start with the code “PDM” followed by a Carriage Return Line Feed.

## **8. CORRECTION OF INVALID/INCORRECT REFERENCE NUMBER**

When the receiving system cannot action the incoming message due to an invalid or incorrect prime reference number, i.e. AWB Identification, Embargo Number or ULD Reference Number, it is recommended that the standard Cargo-IMP Error (FNA) Message is transmitted to the sender of the message.

## **9. OTHER IATA CARGO RELATED MESSAGES (NON CARGO-IMP)**

## **10. TRANSMISSION OF CARGO-IMP MESSAGES THROUGH AIRLINE DATA EXCHANGE NETWORKS**

When a Cargo-IMP Message is transmitted through the airline data exchange networks it is “enveloped” between a “Message Address” header (comprising a message priority indicator, one or more address groups, an origin group and a date/time group) and an “End of Message” trailer.

The definition of the airline data exchange networks envelope is contained in the IATA Systems and Communications Reference Manual. The following descriptions are extracted from, or are in line with, the information contained in that Manual.

10.1 Message Address (Header) Format

\* Address Groups to lengthen to 8 characters as airlines designators change from 2 to 3 characters.

Message Address — Completed Example (single Address, 2-letter company designators):

QK NYCFFPA  
.MSPFCNWP 191615 JK

10.2 Message Priority Indicator

The following “Priority Indicators” may be included in a position prior to the first address in the address section:

| Indicator | Precedence |
|-----------|------------|
| QU        | URGENT     |
| QP        | NORMAL     |

**Note:**

*The nature of the traffic bearing this priority indicator is such that the originator deems that it should be given special attention in local delivery, and that this delivery should not be delayed.*

|    |        |
|----|--------|
| QK | NORMAL |
|----|--------|

**Note:**

*Default for 'normal' message traffic. QK has same precedence as messages bearing no priority indicator.*

QD

DEFERRED

The Priority Indicators QX and QS have distinct meanings in some systems; QX is used for urgent operational traffic and QS for top precedence messages pertaining to the safety of human life.

### **10.3 Address and Origin Groups**

The Address and Origin Groups consist of seven-character groups (these may be extended to eight-letter groups in the future) of which:

- (a) the first three letters shall be a Location Identifier;
- (b) the fourth and fifth characters denote the Office Function Designator (department) within the airline;
- (c) the sixth and seventh characters (or sixth, seventh and eighth letters when used) denote the airline, or appropriate organization.

**Note:**

*Where automated carriers require particular Cargo-IMP Messages to be sent to a specific SITA/ARINC address, address details are included in the appropriate message description contained in the individual message chapter.*

### **10.4 Message Identity**

The message identity is used by the originator to identify the message. There is no standard format although the date/time is often used. The message identity can include any alphanumeric characters plus the full stop (with the exception of upper case H and upper case D).

The use of the oblique (/) character in the message identity is not recommended. If there is no double signature, the message identity must not include an oblique (/) character as the third character following 2 letters as this is read as a double signature.

If the date/time group is used in the message identity, the time must be expressed in UTC.

## **11. TRANSMISSION OF MESSAGES IN A CCS ENVIRONMENT**

To facilitate the role of CCSs in converting between different message standards, i.e. Cargo-IMP and EDIFACT, all messages routed through CCSs are “wrapped” in a standardized EDIFACT envelope as shown below.

### **11.1 Use of the EDIFACT Envelope**

The EDIFACT UNB (interchange header) and UNZ (interchange trailer) segments

are used to envelope EDIFACT Message Interchanges, as shown in the following Interchange example:

For air cargo applications the message sender and recipient are identified in the UNB segment through the PIMA (Participant Identification and Message Addressing) scheme, as shown below.

## 11.2 Description of the UNB Segment (as published in ISO 9735 Ref. 1988 (E))

| UNB  | INTERCHANGE HEADER                                       |   |                       |
|------|----------------------------------------------------------|---|-----------------------|
|      | Function: To start, identify and specify an interchange. |   |                       |
| S001 | SYNTAX IDENTIFIER                                        | M |                       |
| 0001 | Syntax identifier                                        | M | a4                    |
| 0002 | Syntax version number                                    | M | n1                    |
| S002 | INTERCHANGE SENDER                                       | M |                       |
| 0004 | Sender identification                                    | M | an..35 <sup>(*)</sup> |
| 0007 | Identification code qualifier                            | C | an..4                 |
| 0008 | Address for reverse routing                              | C | an..14                |
| S003 | INTERCHANGE RECIPIENT                                    | M |                       |
| 0010 | Recipient identification                                 | M | an..35 <sup>(*)</sup> |

| 0035 | TEST INDICATOR                                 | C | n1     |

: Shaded areas defined by the PIMA Scheme.

### 11.3 Cargo Use of the UNB Segment ('PIMA' Standard)

The 35 character fields for data elements 0004 (Sender Identification) and 0010 (Recipient Identification) are structured, in accordance with the standard 'Participant Identification and Message Addressing (PIMA)' Scheme. The PIMA Scheme is limited to 33 characters, and is structured as follows:

|                            |   |                       | Cargo-IMP<br>Data Element | Example                       |
|----------------------------|---|-----------------------|---------------------------|-------------------------------|
| CCS System Identifier      | M | an3                   | 911                       | CCH(i.e. CCS Switzerland)     |
| CCS Group Code             | M | an3                   | 909                       | AGT (i.e. Agent)              |
| CCS Code Type              | M | an2                   | 912                       | 03 (i.e. Agent Name)          |
| CCS Participant Identifier | M | an..19 <sup>(*)</sup> | 910                       | DANZASBERNE (i.e. Agent Name) |
| Separator                  | C | /                     |                           |                               |
| Airport/City Code          | O | aaa                   | 313                       | BRN (i.e. Airport Code)       |
| CCS Participant Office     | O | n..2                  | 913                       | O8(i.e. Office Code)          |

: Reduced from 21 characters, as agreed at IATA Cargo Services Conference, March 1994.

S001 SYNTAX IDENTIFIER

0001 Syntax identifier: Codes listed in ISO 9735  
UNOA, UNOB, UNOC,

|      |                                        |                                          |
|------|----------------------------------------|------------------------------------------|
|      |                                        | UNOD, UNOE, UNOF                         |
| 0002 | Syntax version number:                 | Codes listed in ISO 9735                 |
| S002 | INTERCHANGE SENDER                     |                                          |
| 0004 | Sender identification                  |                                          |
|      | CCS System Identifier:                 | Codes listed in Cargo-IMP Manual         |
|      | CCS Group Code:                        | Codes listed in Cargo-IMP Manual         |
|      | CCS Code Type:                         | Codes listed in Cargo-IMP Manual         |
|      | CCS Participant Identifier:            | Local                                    |
|      | CCS Dependant                          |                                          |
|      | Separator:                             | /                                        |
|      | Airport/City Code:                     | Codes listed in Airline Coding Directory |

#### 11.4 Description of the UNZ Segment

##### UNZ INTERCHANGE TRAILER

Function: To end and check the completeness of an interchange.

|      |                                  |   |        |
|------|----------------------------------|---|--------|
| 0036 | INTERCHANGE CONTROL COUNT        | M | n..6   |
| 0020 | INTERCHANGE CONTROL<br>REFERENCE | M | an..14 |

#### 11.5 Cargo Use of the UNZ Segment

The various fields shall be completed as follows:

|      |                                   |                    |
|------|-----------------------------------|--------------------|
| 0036 | INTERCHANGE CONTROL COUNT:        | Self-explanatory   |
| 0020 | INTERCHANGE CONTROL<br>REFERENCE: | The same as in UNB |

#### 11.6 Examples of UN/EDIFACT Enveloping

##### (a) Request from an agent to an airline:

```
UNB+UN0A:1+CCHAGT03DANZASBERNE/BRN08:ZI+CCHAIR01ZRHFMRSR:Z1+9206:
1'
UNH+FFR001+IFTMBF:2:912:UN:IATA01'
27SEGMENTS'
UNT+29+FFR001'
UNZ+1+AGT001'
```

##### (b) Answer from the airline to the agent:

```
UNB+UN0A:1+CCHAIR01ZRHFMRSR:Z1+CCHAGT03DANZASBERNE/BRN08:Z1+9206:
```

1'  
UNH+FFA001+IFTMBC:2:912:UN:IATA01'  
18SEGMENTS'  
UNT+20+FFA001'  
UNZ+1+AIR001'

### **11.7 Cargo-IMP Messages Transmitted Under EDIFACT Envelope**

Cargo-IMP messages routed through CCSs are wrapped within the EDIFACT envelope as explained below.

### **11.8 Wrapping of Cargo-IMP Messages**

Each fraction of 5 lines of a Cargo-IMP Message will be included in a FTX segment with the resulting FTX segment(s) preceded by a UNH segment and terminated by a UNT segment.

When packing these fractions of 5 Cargo-IMP lines into one FTX segment the various CRLFs shall be replaced by “:” except the last one which will be replaced by “'”.

### **11.9 Example of Wrapping of Cargo-IMP Message**

(a) Cargo-IMP message before wrapping:

FFA/2  
021-7777777OMSPLHR/P5K575OT9  
AA001/19MAR/JFKLHR/KK  
SSR/TEMP RESTRICTION OK  
/SPL CARE OK  
OSI/NEED TO RECEIVE CGO BY 1800 19 MAR  
/AND TO MEET THE AGENT  
REF/MSPFCNW/4923ACA

(b) Cargo-IMP message after wrapping:

UNH+FFA911+CIMFFA:0:0:IA'  
FTX+CIM+++FFA/2:021-7777777OMSPLHR/P5K575OT9:AA001/19MAR  
/JFKLHR/KK:SSR/TEMP RESTRICTION OK:/SPL CARE OK'  
FTX+CIM+++OSI/NEED TO RECEIVE CGO BY 1800 19 MAR;  
/AND TO MEET THE AGENT:REF/MSPFCNW/4923ACA'  
UNT+4+FFA911'

### **11.10 Use of the EDIFACT Message Header**

The EDIFACT UNH message header is used to start, identify and specify a message.

### **11.11 Description of the UNH Segment (as published in ISO 9755 Ref. 1988**

**(E))**

| <b>UNH</b> | <b>MESSAGE HEADER</b>     |   |        |
|------------|---------------------------|---|--------|
| 0062       | MESSAGE REFERENCE NUMBER  | M | an..14 |
| S009       | MESSAGE IDENTIFIER        | M |        |
| 0065       | Message type              | M | an..6  |
| 0052       | Message version number    | M | an..3  |
| 0054       | Message release number    | M | an..3  |
| 0051       | Controlling agency        | M | an..2  |
| 0057       | Association assigned code | C | an..6  |
| 0068       | COMMON ACCESS REFERENCE   | C | an..35 |
| S010       | STATUS OF THE TRANSFER    | C |        |
| 0070       | Sequence of transfers     | M | n..2   |
| 0073       | First and last transfer   | C | a1     |

**11.12 Cargo Use of the UNH Segment**

The various fields in the EDIFACT UNH message header are completed as follows:

|      |                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|------|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 0062 | MESSAGE REFERENCE<br>NUMBER |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| S009 | MESSAGE IDENTIFIER          | <b>In case of EDIFACT<br/>message:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## 12. RETURN INFORMATION FIELD ('RIF') ADDRESSING STANDARD FOR CCS/PARTICIPANT COMMUNICATION

For messages which are converted between EDIFACT and Cargo-IMP standards, and then routed to/ from CCS 'participant' systems, the 'RIF' Standard is applied in order to retain 'PIMA' address information within the message envelopes. CCS 'participant' is defined within this context as an airline or user of a SITA/ARINC Type 'B' connection.

The 'RIF' Standard provides the transfer, upon message conversion, of 'PIMA' data between the EDIFACT envelope and the Type 'B' IATA envelope. This transfer is necessary in order to retain sender and addressee address information throughout the message transmission cycle, from sender to destination and back via the response message, and several CCSs as necessary.

The following benefits accrue to airline CCS users, through the use of the 'RIF' Standard:

- provides onward routing of messages to parties who do not have their own SITA/ARINC address, but who support EDIFACT envelopes; and
- allows unique identification of EDIFACT end-users for purposes of security checking (ex. to check if a party requesting a booking is authorized to do so);

Similarly the following benefits accrue to agents:

- enables a requesting agent to forward the message response to the originating customers' terminal/file/representative.

## 12.1 Description of the 'RIF' Standard — EDIFACT Envelope

The following is return address information which is structured within the EDIFACT UNB Segment:

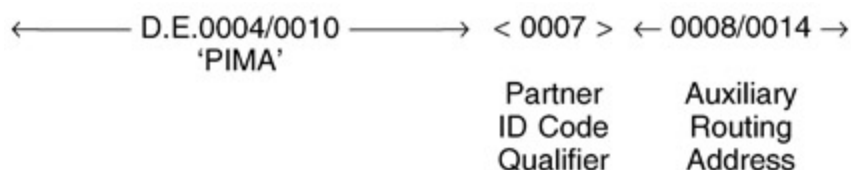

| UN/EDIFACT Data element                          | M/C | Format | Length<br>Used |
|--------------------------------------------------|-----|--------|----------------|
| S002 INTERCHANGE SENDER                          | M   |        |                |
| - or -                                           |     |        |                |
| S003 INTERCHANGE RECIPIENT                       | M   |        |                |
| 0004 Sender identification <sup>(*)</sup>        | M   | an..35 | 33             |
| - or -                                           |     |        |                |
| 0010 Recipient identification <sup>(*)</sup>     | M   | an..35 | 33             |
| 0007 Partner ID code qualifier                   | C   | an.. 4 | 4              |
| 0008 Address for Reverse Routing <sup>(**)</sup> | C   | an..14 | 14             |
| - or -                                           |     |        |                |
| 0014 Routing Address <sup>(**)</sup>             | C   | an..14 | 14             |

<sup>(\*)</sup>: Data elements 0004/0010 represent the 'PIMA' addressing scheme.

<sup>(\*\*)</sup>: Data elements 0008 and 0014 are referred to generically as the 'Auxiliary Routing Address'. Data element 0008 is used for incoming messages while 0014 is used for responses.

### Example — EDIFACT Envelope (from UNB segment):

CGNTRK09TULIPTRUCKERCOMPANY/AMS99:PIMA:WIMSMAINOFFICE

## 12.2 'RIF' Standard — IATA Envelope

The RIF Standard provides for placement of the EDIFACT envelope address information (less data element 0007) into the 'Message Identity' portion of the IATA envelope.

In transferring this data, the 'slash' separating the CCS Participant Identifier and Airport/City Code within the PIMA Scheme, is replaced by a 'period'. This ensures that the 'slash' separator is uniquely used, within the Type 'B' envelope, to indicate the end of the Double Signature Group.

The resulting 'Origin Line' of the IATA envelope is structured as follows:

|                           | Max. Field Length | M/C/O | Note                  |
|---------------------------|-------------------|-------|-----------------------|
| Origin Group              | 9 (*)             | M     |                       |
| Separator (Space)         | 1                 | M     |                       |
| Double Signature Group    | 3 (*)             | O     |                       |
| Separator (/)             | 1                 | C     | Include i<br>Signatur |
| UTC Date/Time             | 6                 | M     |                       |
| Separator (Space)         | 1                 | C     |                       |
| PIMA                      | 33                | O     |                       |
| Separator(-)              | 1                 | C     | Include i<br>PIMA Inc |
| Auxiliary Routing Address | 14                | O     | Address follows       |
| Total                     | 69                |       |                       |

(\*) to allow future extension of the company designator from 2 to 3 characters.

**Example — IATA Envelope (using a 2-character company designator):**

### 13. PRESENTATION OF DIRECTORY

#### 13.1 Presentation of Data Elements in the Directory

Each identified data element has been given:

- (a) a data element name;
- (b) a description of the concept to explain the agreed meaning and to aid in determining the content of the information (data item) to be provided with the data element;

- (c) a specification of the character representation of the data item, with indication of space (in number of characters) available and, when applicable or required:
- (d) references which refer users to other parts of the Directory, or to other sources, as appropriate;
- (e) synonyms of data element names where such are widely used.

It is assumed that most data elements can be expressed either in plain language or in code, and it is recognized that there will be a need to refer to either of these versions, and sometimes to both.

Mainly for identification and management purposes, each data element is provided with a numeric identifier (tag).

## 13.2 Layout of Data Element Entries

The first line of each data element entry contains the numeric tag and the second line contains the name of the data element.

In addition, each data element entry contains a number of parts, identified by a header. The following headers are used to designate the different parts of the entries:

|                  |                                                                                    |
|------------------|------------------------------------------------------------------------------------|
| "Alt. Name"      | = synonymous names of the data element;                                            |
| "Description"    | = description of the data element;                                                 |
| "Format"         | = character representation, space available;                                       |
| "Cargo-IMP Ref." | = reference to an indicated source of information<br>— usually the Coding section; |
| "Note"           | = additional information, when appropriate.                                        |

Data element entries are separated from each other by a line.

## 13.3 Abbreviations of Character Representations

See [Element Character Format](#) of General Information for more details concerning the abbreviations used to explain character representation.

# 14. CATEGORIES OF DATA ELEMENTS

## 14.1 Categories of Data Elements, Allocation of Identifiers (Tags)

Three-digit numbers are used as data element identifiers (tags) in the Directory. Taking into account the desirability of grouping the data elements into broad categories in a way that will assist users of the Directory, the numbers have been assigned as follows:

- (a) 000 to 099 are not used;
- (b) 100 to 999 are used for random allocation of tags to the data elements, within the framework of a sub-division into 9 general categories, as specified in [14.3](#).

The purpose of the tags is to provide language independent identifiers for the data

elements; the only significance attributed to the numbers is their designation of broad categories.

## **14.2 Grouping of Data Elements into Broad Categories**

The system selected for the Directory for grouping data elements into broad categories is based on the characteristics of the data item, taking into account its nature rather than its application area. This means that all dates are placed in one group, all names in another, and all amounts in a third, without any consideration of the kind of date, name and amount.

Users, even if they do not know the exact name of a data element, or in which application area a particular data element might have been placed, are likely to know the expected contents of the data item with sufficient accuracy to be able to find it within a limited range of not more than one hundred data elements placed together according to this principle.

## **14.3 Category Description**

As set out in [14.2](#) the data elements have been grouped into broad categories in a way that will assist users of the Directory, at the same time taking into account the need to reserve substantial capacity for future newly defined data elements.

The following grouping is used in the Directory:

### **Group 1: (100–149) Documentation, references**

Data elements intended for data handling or documentation purposes, such as document and message names, references and reference numbers, ordinal numbers such as item and page numbers, number of copies of documents.

### **Group 2: (200–249) Dates, times, periods of time**

All expressions of time, such as calendar dates, periods of time (month, week, day), time limits, commencement and expiry dates.

### **Group 3: (300–349) Parties, addresses, places, countries**

Names and addresses of legal and physical persons, designations of officials, organizational units, places, countries, routes.

### **Group 4: (400–449) Clauses, conditions, terms, instructions**

Authentications, authorizations, endorsements, certifications, clauses, conditions, terms, reference clauses, stamps, labels, requests, instructions, receipts, statements, information texts.

### **Group 5: (500–549) Amounts, charges, percentages**

Financial values, amounts, charges; other quantities and values for commercial, transport, customs, statistical and

any other purposes; other details such as prices, rates, percentages and discounts, used as a basis for invoice calculations, etc.

**Group 6: (600–649) Measure identifiers, quantities (other than monetary)**

Dimensions, weights, volumes, distances, temperature, currency, other quantities, with the exception of monetary quantities in Group 5, measure unit specifiers.

**Group 7: (700–749) Goods and articles: descriptions and identifiers**

Descriptions, classifications and identification of goods and articles, consignment identifiers, number and kind of packages, dangerous goods details.

**Group 8: (800–849) Transport modes and means, ULDs (aircraft containers and pallets)**

Identification and description of means of transport and ULDs, transport equipment details, transport modes and movements, voyage and flight numbers.

**Group 9: (900–949) External Requirements (Customs, etc.)**

Data elements used for the interchange of information with external parties such as Customs Authorities, Agents, etc.

#### **14.4 Sub-Data Elements**

The Sub-Data Elements represent the description used to identify the variations of the Data Elements used in the “Element” column of the Message Specifications.

### **15. MESSAGE TYPE VERSION NUMBERS**

The Message Type Version Number was first introduced in the 9th Edition of the Cargo-IMP Manual. All new Message Specifications in that Edition, and those that had been amended from the 8th Edition, included a Message Type Version Number.

All other messages do not include the version number .

### **16. EXCHANGE PARTIES CAPABILITIES**

Message Exchange Parties can be airlines or third parties (such as handling agents) with computer systems that are capable of interchanging Cargo-IMP Messages.

The individual user tables indicate the information available at the time of publication of this Edition of the CIMP. Any additional information may be obtained from the author, whose address is included in the Preface of this product.

As the Cargo-IMP users included may not be exhaustive, parties are asked to send identification of further Cargo-IMP users to the author as well.

The user tables contain the message version numbers for Cargo-IMP messages supported by users of the Cargo-IMP standard.

Cargo-IMP users are presented as two separate groups:

- Airlines
- Forwarders, Handling Agents and Third Parties

Two addresses are indicated:

- the address for the Cargo Control Computer
- the address for the Cargo Data Interchange Coordinator for each system

For parties wishing to exchange messages with airlines, it is recommended that communication first be made with the Airline Respondant/Coordinator indicated.

The following is a list of symbols used in this section. They indicate the status of support for a given message version, for each particular party.

- T = supported for transmission only  
R = supported for receiving and processing only  
B = supported for both Transmission and Receiving  
x = does not exist, and is therefore, “not-applicable”  
– = not supported

An asterisk (\*) in the user's table indicates that a special condition applies to that particular message or exchange party. The details are to be found following the table.

## **17. “GENERAL” NOTES**

### **Introduction to “General” Notes**

The specification for each Cargo-IMP message includes a “Note” column. Most notes referenced in the column are specific to one message, e.g. FWB1 or FFM1. “Message Specific” notes and “Conditional and Qualification” notes are found at the end of each message specification.

Some notes apply to several messages. These notes are referred to a “General” notes. They are referenced in the message specification “Note” column as “GEN1”, “GEN2” etc. The “General” notes are listed below.

### **GEN1 — Split of Cargo-IMP Messages**

Cargo-IMP Messages are limited to a maximum length of 3500 characters.

A general message split procedure is used for messages which may exceed 3500 characters (except for FFM and FBL messages which have been designed with a multi-part format).

The general message split procedure is described in [4.9.2](#) of Chapter 1 of the

Manual.

## **GEN2 — Dates and Times in Cargo-IMP Messages**

Dates and times in Cargo-IMP messages are given in the “local time” at the place at which the associated action occurs.

UTC (Universal Coordinated Time) is only used in the messages relating to Embargos (FMB, FMC, FMX) where the Start of Embargo and End of Embargo are specified as Date (in UTC) and Time (in UTC).

## **GEN3 — Length of Consignment Detail Line**

In order to achieve a logical grouping of consignment data the “Consignment Detail” line has been defined with a theoretical maximum line length of 71 characters, i.e. the Cargo-IMP maximum line length of 69 characters has been exceeded.

It is considered extremely unlikely that all the data elements in the Consignment Detail line will be included at their maximum length. However, should this circumstance arise the one (or two) least significant characters will be “dropped” from the Nature of Goods data element to reduce the line length back to 69 characters.

## **GEN4 — Airline and Company Designators**

The actual format is either aa, na or an. For future planning purposes, it should be noted that the format may become “aaa”.

## **GEN5 — Airline and Company Designators**

The two-character format (aa, na or an) may be used instead of the three-character format (aaa).

## **GEN6 — Credit Card Masking**

As per “Payment Card Industry Data Security Standards(PCI DSS)”, masking shall be applicable to the credit card number display, a maximum of the first six and last four digits (1234 56XX XXXX 7890) can be displayed.

## **18. CCC/IATA CUSTOMS-AIRLINES MESSAGES**

This Manual contains the Customs-Airlines Messages that were developed and agreed by the Joint Project undertaken by the Customs Cooperation Council (CCC) and IATA.

The interchange of data between Customs and Airlines is governed by a Memorandum of Understanding between the CCC and IATA, a CCC Recommendation and by IATA CSC Resolution 656.

The CCC/IATA Message Specifications contained in this Manual are amended versions to the message specifications published in Appendix ‘A’ of the CCC/IATA

Joint Customs/Airlines Electronic Data Interchange Manual.

These CCC/IATA Message Specifications replace the Development Proposals for Airline Customs Messages that have been published in previous Editions of the Cargo-IMP Manual.

Users planning to develop or implement these Messages are requested to contact the Secretariat.

## **CASS ADVICE OF CORRECTION (CAC) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = CAC**

### **2. MESSAGE FUNCTION**

To advise the CASS Settlement Office of a correction to an air waybill transaction to be invoiced by the Settlement Office.

### **3. MESSAGE APPLICATION**

Computer-to-Computer.

### **4. MESSAGE EXCHANGE PARTIES**

From: the computer access address of a CASS-EDI airline.

To: the computer access address of the CASS-EDI mailbox.

### **5. MESSAGE USE**

The CAC message is sent by an airline to the CASS Settlement Office to correct air waybill amounts to be invoiced to an agent. The Settlement Office will reflect the correction in the invoice produced for submitting airline.

### **6. MESSAGE EXAMPLES**

#### **6.1 Advice of corrections to an AWB transaction previously invoiced.**

## 9. CASS ADVICE OF CORRECTION MESSAGE LAYOUT

—

# CUSTOMS INVENTORY REPORT (CIR) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = CIR

## 2. MESSAGE FUNCTION

### 2.1 Air Waybill Information

To declare consignment information for:

- each simple air waybill (covering a single shipment);
- each master air waybill (covering a group of consolidated “house” shipments);
- each individual “house” waybill (where the airline is breaking down a consolidation and will control and deliver at the house waybill level);

imported or to be imported from foreign countries.

### 2.2 Flight Information

To supply flight information if available at time of transmission.

## 3. MESSAGE APPLICATION

Computer-to-Computer.

## 4. MESSAGE EXCHANGE PARTIES

From: the access address of the Cargo Control Computer of the airline (or other party who is acting for the airline).

To: the access address of the Cargo Control Computer of Customs and/or Other Interested Parties, e.g. broker, Community System.

## 5. MESSAGE USE

To be sent as a result of:

Earliest: Goods acceptance at origin.

Latest: Goods check-in at port of arrival.

## 6. MESSAGE EXAMPLES

**6.1** Advice to Customs of the expected arrival (with flight details) of a simple air waybill shipment.

## 8. MESSAGE NOTES

CIR20 [Ref. 2.4](#) Master AWB Indication (included if House Waybills are associated with the AWB Identification).

CIR21 [Ref. 2.5](#) HWB Identification (included if carrier breaks down a consolidation and controls and delivers at a House Waybill level).

CIR22 [Ref. 4.4](#) Nature of Goods Details  
The number of repeats is determined by the information reported on the Air Waybill. Apart from Nature and Quantity of Goods, one, or more, of the following may be present:

Dimensions, ULD Number, Harmonised Commodity Code, Country of Origin of Goods.

CIR23 [Ref. 5.6.3](#) Separator (if [5.6.4](#) included).

CIR24 [Ref. 5.7.3](#) Separator (if [5.7.4](#) and/or [5.8](#) included).

CIR26 [Ref. 6.6.3](#) Separator (if [6.6.4](#) included).

CIR27 [Ref. 6.7.3](#) Separator (if [6.7.4](#) and/or [6.8](#) included).

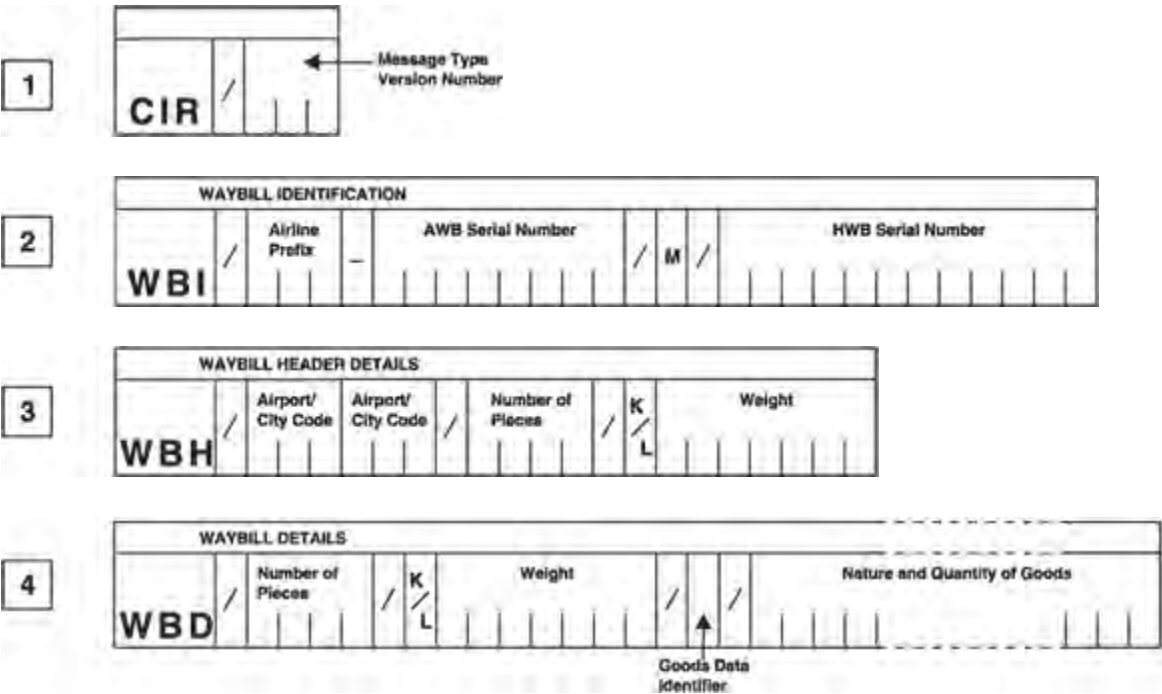

CIR28 [Ref. 7.6.3](#) Separator (if [7.6.4](#) included).

CIR29 [Ref. 7.7.3](#) Separator (if [7.7.4](#) and/or [7.8](#) included).

## **CUSTOMS SUPPLEMENTARY INFORMATION (CSI) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = CSI**

### **2. MESSAGE FUNCTION**

**2.1** To update or amend consignment information for:

- a simple air waybill (covering a single shipment);
- a master air waybill (covering a group of consolidated “house” shipments);
- an individual “house” waybill (where the airline is breaking down a consolidation and will control and deliver at the house waybill level);

supplied to Customs in a CIR and/or previous CSI messages.

**2.2** To cancel a Customs Inventory Report.

### **3. MESSAGE APPLICATION**

Computer-to-Computer.

### **4. MESSAGE EXCHANGE PARTIES**

From: the access address of the Cargo Control Computer of the airline (or other party who is acting for the airline).

To: the access address of the Cargo Control Computer of Customs and/or Other Interested Parties, e.g. broker, Community System.

### **5. MESSAGE USE**

The CSI message is sent at the completion of an update/amendment input to a record in the airline in-house system.

### **6. MESSAGE EXAMPLES**

**6.1** Amend the origin of a simple air waybill shipment.

| <b>Ref.</b> | <b>Message Content</b> |
|-------------|------------------------|
| 1           | CSI/4                  |
| 2           | WBI/125-12345675       |
| 3           | AMD/CH                 |
| 4           | WBH/DXB JFK/100/K1000  |

**6.2** Provide Flight Information for a master air waybill not supplied in CIR Message.

| <b>Ref.</b> | <b>Message Content</b> |
|-------------|------------------------|
| 1           | CSI/4                  |
| 2           | WBI/074-72482126/M     |

# **CUSTOMS STATUS NOTIFICATION (CSN) MESSAGE**

## **1. STANDARD MESSAGE IDENTIFIER = CSN**

## **2. MESSAGE FUNCTION**

**2.1** To update the inhouse system of the airline (or cargo terminal operator) with details of Customs determination.

**2.2** Where appropriate, to update the system of the airline (or cargo terminal operator) with details of action taken by other Government agencies.

**2.3** To notify the airline (or cargo terminal operator) of shipments required for examination or released for delivery.

## **3. MESSAGE APPLICATION**

Computer-to-Computer.

## **4. MESSAGE EXCHANGE PARTIES**

From: the access address of the Cargo Control Computer of Customs and/or other Government agencies.

To: the access address of the Cargo Control Computer of the airline (or other party who is acting for the airline) and/or other Interested Parties, e.g. broker, Community System.

## **5. MESSAGE USE**

**5.1** When the Customs system initiates (or is updated with details of) action effecting the Customs status of a particular shipment a CSN message will be sent to the airline (or the cargo terminal operator).

**5.2** When a Government Agency places or releases a "hold" on a particular shipment that Agency (in cooperation with Customs) will make the necessary input to trigger a "hold" or "release hold" message to the airline (or the cargo terminal operator).

## **6. MESSAGE EXAMPLES**

**6.1** A Customs entry for a simple air waybill has been selected for goods and document examination.

## 8. MESSAGE NOTES

- CSN1 [Ref. 9.](#) Other Customs, Security and Regulatory Control Information  
The composition of the OCI line depends upon which Customs, Security and Regulatory Control Information Identifier is used and must be in accordance with the [OCI composition rules table below](#).
- CSN20 [Ref. 2.4](#) Master AWB Indication (included if House Waybills are associated with the AWB Identification).
- CSN21 [Ref. 2.5](#) HWB Identification (included if carrier breaks down a consolidation and controls and delivers at a House Waybill level).
- CSN23 [Ref. 7.](#) Cargo Control Location (if required by Customs).
- CSN24 [Ref. 8.](#) Nominated Agent/Consignee (if required by Customs, at least one of elements [8.3](#) or [8.5](#) must be included).
- CSN25 [Ref. 8.4](#) Separator (if [8.5](#) included).
- CSN26 [Ref. 3.5.6](#) Separator (if [3.5.7](#) included).
- CSN27 [Ref. 9.3](#) ISO Country Code  
[Ref. 9.5](#) Information Identifier  
[Ref. 9.7](#) Customs Information Identifier  
(At least one of Ref. [9.3](#)., Ref. [9.5](#). or Ref. [9.7](#). must be included).

### 8.8.1 OCI composition rules table

| ISO Country Code | Information Identifier | Customs, Security and Regulatory Control Information Identifier | Explanatory notes on allowed values for the Information Identifier and completion examples. Any Screening Method, Screening Exemption or Security Status codes are to be included in the Supplementary Customs, Security and Regulatory Control Information and not in the Information Identifier.                                      |

## **CASS DEBIT OR CREDIT MEMORANDUM (DCM) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = DCM**

### **2. MESSAGE FUNCTION**

To advise the CASS Settlement Office of an adjustment (debit or credit) to an air waybill transaction which has already been invoiced by the Settlement Office.

### **3. MESSAGE APPLICATION**

Computer-to-Computer.

### **4. MESSAGE EXCHANGE PARTIES**

From: the computer access address of a CASS-EDI airline.

To: the computer access address of the CASS-EDI mailbox.

### **5. MESSAGE USE**

The DCM message is sent by an airline to the CASS Settlement Office to adjust air waybill amounts previously invoiced to an agent. The Settlement Office will reflect the adjustment in the subsequent invoice produced for the submitting airline.

### **6. MESSAGE EXAMPLES**

#### **6.1 Advice of corrections to an AWB transaction previously invoiced.**

## **AIRLINE CONFIRMATION (FAC) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = FAC**

### **2. MESSAGE FUNCTION**

**2.1** To confirm or further adjust any information previously transmitted in an Adjustment Request (FAR) message.

**2.2** To further adjust any information previously transmitted in a Freight Transaction (FFT) or Air Waybill Data (FWB) message containing net billing information.

**2.3** To confirm or further adjust any information previously transmitted in an Adjustment Request (FAR) message after a CASS invoice has been issued.

### **3. MESSAGE APPLICATION**

Computer-to-Computer.

### **4. MESSAGE EXCHANGE PARTIES**

From: the computer access address of a CASS-EDI airline.

To: the computer access address of the CASS-EDI mailbox; the  
computer access address of a CASS-EDI agent.

### **5. MESSAGE USE**

**5.1** The Airline Confirmation message is to used by the CASS-EDI airline:

1. to confirm that any amount requested for adjustment is acceptable;
2. to further adjust any of the amounts transmitted in an Adjustment Request (FAR) message;
3. to adjust any amount previously transmitted in a Freight Transaction (FFT) or Air Waybill Data (FWB) message containing net billing information.

For AWB Reporting, the message is only valid if a Freight Transaction (FFT) message or Air Waybill Data (FWB) message containing net billing information has previously been transmitted to the CASS-EDI mailbox.

In this instance, the number of Airline Confirmation messages per air waybill number is limited to 2.

### **6. MESSAGE EXAMPLES**

**6.1** Confirmation of adjustment of the currency exchange rate.

## ADVICE OF DISCREPANCY (FAD) MESSAGE

### 1. STANDARD MESSAGE IDENTIFIER = FAD

### 2. MESSAGE FUNCTION

To advise an apparent error in the movement of cargo and/or associated documentation found at destination, en route or at departure (see Cargo Services Conference Resolutions Manual, Resolution 610 and Recommended Practice 1600q).

### 3. MESSAGE APPLICATION

Computer-to-Manual/Manual-to-Manual.

### 4. MESSAGE EXCHANGE PARTIES

From: the party facing the discrepancy.

To: the station(s) as indicated in the Recommended Practice 1600q.

### 5. MESSAGE USE

—

### 6. MESSAGE EXAMPLES

#### 6.1 “Found Cargo” discrepancy (en route or at destination).

| Ref. | Message Content                   |

# **FREIGHT AGENT INFORMATION (FAI) MESSAGE**

## **1. STANDARD MESSAGE IDENTIFIER = FAI**

## **2. MESSAGE FUNCTION**

To declare handling information for:

- each simple air waybill (covering a single shipment);
- each master air waybill (covering a group of consolidated “house” shipments);
- each individual “house” waybill (where the airline is breaking down a consolidation and will control and deliver at the house waybill level);
- a special cargo shipment.

## **3. MESSAGE APPLICATION**

Computer-to-Computer/Computer-to-Manual.

## **4. MESSAGE EXCHANGE PARTIES**

From: the Airline.

To the access address of the Cargo Control Computer of the  
(Computer): Nominated Broker and/or responsible Handling Agent or party.

To (Manual): the predestined address of the Nominated Broker and/or responsible Handling Agent or party.

## **5. MESSAGE USE**

**5.1** To inform the broker and handling parties of expected flight details before flight arrival.

**5.2** To inform the handling parties on nominated broker.

**5.3** To provide the broker and handling parties with information such as cargo location, arrival detail, total collect charges, storage location and customs origin code.

**5.4** To provide basic air waybill information for broker and handling parties in case they cannot receive an FWB/FSB Message.

## **6. MESSAGE EXAMPLES**

**6.1** To advise a broker/handling party of the expected arrival (with flight details) of a simple air waybill shipment with the assumption that an FWB/FSB has already been transmitted.

## **ADJUSTMENT REQUEST (FAR) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = FAR**

### **2. MESSAGE FUNCTION**

**2.1** To request an adjustment to one of the monetary amount fields previously transmitted in a Freight Transaction (FFT) or an FWB message containing net billing information.

**2.2** To request adjustments to CASS settlement amounts from a prior CASS billing period for which a CASS invoice has been issued.

### **3. MESSAGE APPLICATION**

Computer-to-Computer.

### **4. MESSAGE EXCHANGE PARTIES**

From: the computer access address of a CASS-EDI agent.

To: the computer access address of the CASS-EDI mailbox; the computer access address of a CASS-EDI airline.

### **5. MESSAGE USE**

**5.1** This message is used by the CASS-EDI airline to consider a correction (adjustment) to information previously transmitted to the CASS-EDI mailbox in a FFT or FWB message containing net billing information.

Only one FAR message is allowed for each air waybill reported.

**5.2** The message may also be to request adjustments once a CASS invoice has been issued for a specified billing period.

Only one FAR message is allowed for each air waybill reported.

### **6. MESSAGE EXAMPLES**

**6.1** Request to adjust the currency exchange rate.

# FREIGHT AGENT SUPPLEMENTARY INFORMATION (FAS) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = FAS

## 2. MESSAGE FUNCTION

To update or amend handling information for:

- each simple air waybill (covering a single shipment);
- each master air waybill (covering a group of consolidated “house” shipments);
- each individual “house” waybill (where the airline is breaking down a consolidation and will control and deliver at the house waybill level);
- supplied to a broker or handling parties in a FAI and/or previous FAS Messages;
- special cargo shipment.

## 3. MESSAGE APPLICATION

Computer-to-Computer/Computer-to-Manual.

## 4. MESSAGE EXCHANGE PARTIES

From: the Airline.

To the access address of the Cargo Control Computer of the  
(Computer): Nominated Broker and/or responsible Handling Agent or party.

To (Manual): the predestined address of the Nominated Broker and/or responsible Handling Agent, or party.

## 5. MESSAGE USE

To advise changes, additions and deletions to the previous FAI or FAS Messages after update/ amendment input to a record in the airline inhouse system.

## 6. MESSAGE EXAMPLES

### 6.1 To amend the origin of a simple air waybill shipment.

## **FREIGHT BOOKED LIST (FBL) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = FBL**

### **2. MESSAGE FUNCTION**

To supply a complete list of consignments for which space has been reserved in a particular flight, including details of the agent/airline from which the consignments will be received and, if known, inward flight details as well.

### **3. MESSAGE APPLICATION**

Computer-to-Computer/Computer-to-Manual/Manual-to-Computer/Manual-to-Manual.

### **4. MESSAGE EXCHANGE PARTIES**

From: the handled carrier.  
To the access address for the Cargo Control Computer of the  
(Computer): handling party (carrier or agent).  
To (Manual): the destination station office of the airline operating the  
flight.

### **5. MESSAGE USE**

#### **5.1 Intention**

When a carrier is controlling his own flight but the physical handling of consignments is carried out by a handling party (agent/airline), the former will issue an FBL message to the latter to provide him with a complete list of consignments for which space has been booked and any other relevant information.

### **6. MESSAGE EXAMPLES**

#### **6.1 Single destination list.**

## 8. MESSAGE NOTES

FBL1 [Ref. 1](#)

[Ref.](#)  
[9.3.3](#)

For a SINGLE DESTINATION flight the Freight Booked List comprises:

PART MESSAGE IDENTIFIER

1 —

PART ORIGIN HEADER

2 —

Occurs once only per message.  
Comprises elements [2.1](#) thru [2.7](#).

PART DESTINATION HEADER

3 —

Occurs once only per message.  
Comprises elements [3.1](#) thru [3.3](#).

PART BOOKED CARGO

4 —

Repeated for each booked consignment.  
Comprises complete sets of consignment information (elements [4.1](#) thru [9.3](#)) for each booked consignment.

PART LIST TRAILER

5 —

Occurs once only per message.  
Comprises an end code identifying the:

- end of a message (notification that a further message relating to the same flight manifest will follow, see note [FBL4](#));
- end of list (notification that a list transmission is complete).

FBL2 [Ref. 1](#)

For a MULTI-DESTINATION flight the Freight Booked List comprises:

PART MESSAGE IDENTIFIER

1 —

PART MANIFEST HEADER

2 —

Occurs once only per message.

| 4 —  | Repeated for each consignment. |   |                                       |
| PART | LIST TRAILER                   |   |                                       |
| 5 —  | Occurs once only per message.  |   |                                       |

- FBL3 [Ref. 3.2](#) If no consignment is booked for a particular destination airport the DESTINATION HEADER for that airport is extended to include element [3.2](#) (NIL Cargo Indication). The BOOKED CARGO details which would normally follow a DESTINATION HEADER are omitted.
- FBL4 [Ref. 2.1](#)  
[Ref. 11](#) A Freight Booked List can be transmitted as a sequence of FBL messages. (This is sometimes necessary due to message length constraints imposed by the transmission network.)  
Each individual message must commence with MESSAGE IDENTIFIER, MANIFEST HEADER and DESTINATION HEADER. Within the ORIGIN HEADER, a message sequence number identifies the sequence in which individual FBL messages have been transmitted.  
The use of the code “CONT” (continued) in the LIST TRAILER at the end of a FBL message signifies that a further message relating to the same flight manifest will be transmitted.  
The use of the code “LAST” in the LIST TRAILER at the end of a FBL message signifies that the list transmission is complete.
- FBL20 [Ref. 3.2](#) NIL Cargo Indication (if no cargo is booked for this airport).
- FBL21 [Ref. 4.5](#) Density Group (if [4.4](#) not included).
- FBL22 [Ref. 4.6.2](#) Number of Pieces (zero if unknown).
- FBL23 [Ref. 4.4](#) Volume Detail (if [4.5](#) not included).
- FBL24 [Ref. 7.5.3](#) ULD Owner Code (if [7.5.2](#) included).
- FBL25 [Ref. 10.](#) Other Customs, Security and Regulatory Control Information  
The composition of the OCI line depends upon which Customs,

Security and Regulatory Control Information Identifier is used and must be in accordance with the OCI composition rules table below.

- FBL26 [Ref. 10.3](#) ISO Country Code
- [Ref. 10.5](#) Information Identifier
- [Ref. 10.7](#) Customs Information Identifier  
(At least one of Ref. [10.3.](#), Ref. [10.5.](#) or Ref. [10.7.](#) must be included).
- FBL27 [Ref. 4.8](#) Separator (if [4.9](#) included).

### 8.8.1 OCI composition rules table

| ISO Country Code | Information Identifier | Customs, Security and Regulatory Control Information Identifier | Explanatory notes on allowed values for the Information Identifier and completion examples. Any Screening Method, Screening Exemption or Security Status codes are to be included in the Supplementary Customs, Security and Regulatory Control Information and not in the Information Identifier. |

# CHARGES CORRECTION ACKNOWLEDGEMENT (FCA) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = FCA

## 2. MESSAGE FUNCTION

To notify the carrier issuing a Charges Correction Request (FCC) Message that the request has been received and actioned.

## 3. MESSAGE APPLICATION

Manual-to-Manual.

## 4. MESSAGE EXCHANGE PARTIES

From: the party receiving the Charges Correction Request (FCC) Message.

To: the party (as indicated in the signature of the FCC Message) from which the Charges Correction Request (FCC) Message was received.

## 5. MESSAGE USE

—

## 6. MESSAGE EXAMPLES

### 6.1 Acknowledge with minimum information.

| Ref. | Message Content           |

## **CASS INVOICE (FCI) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = FCI**

### **2. MESSAGE FUNCTION**

To advise the CASS-EDI agent of each air waybill transaction and the amount payable in a given CASS billing period.

### **3. MESSAGE APPLICATION**

Computer-to-Computer.

### **4. MESSAGE EXCHANGE PARTIES**

From: the computer access address of the CASS Settlement Office.

To: the computer access address of the CASS-EDI mailbox;  
or  
the computer access address of the CASS-EDI agent or airline mailbox;  
or  
the computer access address of the CASS-EDI airline or the CASS-EDI agent.

### **5. MESSAGE USE**

The CASS EDI Invoice results from the processing of either the Freight Transaction (FFT) or the net Air Waybill Data (FWB) message, with the Adjustment Request (FAR) and the Airline Confirmation (FAC) messages transmitted by CASS-EDI airlines and the CASS-EDI agents to the CASS-EDI mailbox.

The CASS Invoice message is transmitted to the CASS-EDI mailbox and/or directly to the CASS-EDI airlines and agents.

### **6. MESSAGE EXAMPLES**

#### **6.1 Invoice to CASS-EDI agent for more than one airline for net invoice amounts only.**

[-] 11.6 Separator : CRLF

Status: 

[-] 12. CCA/Adjustment Information

Status: 

[-] 12.1 Line Identifier

Status: 

Character Format: aaa

Data Element No. [103](#)

[-] 12.2 CCA/Adjustment details as per elements [6.2](#) to [6.8](#) above.

Status: 

Elements 12.6 thru 12.8 can be repeated.

[-] 13. CCA/Adjustment Supplementary Information

Status: 

[-] 13.1 Line Identifier

Status: 

Character Format: aaa

Data Element No. [103](#)

[-] 13.2 CCA/Adjustment Supplementary Details as per elements [7.2](#) to [7.16](#) above.

Status: 

Elements 12 thru 13 can be repeated.

[-] 14. CCA/Adjustment Prepaid Charge Summary

Status: 

[-] 15. CCA/Adjustment Collect Charge Summary

Status: 

[-] 16. CCA/Adjustment Total Information

Status: 

[-] 16.1 Line Identifier

Status: 

Character Format: aaa

Data Element No. [103](#)

[-] 16.2 CCA/Adjustment Total Information Summary details as per elements [10.2](#) to [10.4](#) above.

Status: 

Elements 16.2 thru 16.4 can be repeated.

[-] 17. CCA/Adjustment Total Weight Summary

Status: 

[-] 17.1 Line Identifier

Status: 

Character Format: aaa

Data Element No. [103](#)

[-] 17.2 CCA/Adjustment Total Weight Summary details as per elements [11.2](#) to [11.6](#) above.

Status: 

[-] 18. Invoice Total Amount Information

Status: 

[-] 18.1 Line Identifier

Status: 

Character Format: aaa

Data Element No. [103](#)

[-] 18.2 Total Invoice Amount details as per elements [10.2](#) to [10.4](#) above.

Status: 

Elements 18.2 thru 18.4 can be repeated.

[-] 19. Invoice Total Weight Summary

Status: 

[-] 19.1 Line Identifier

Status:  Character Format: aaa Data Element No. [103](#)

[-] 19.2 Invoice Total Weight Summary details as per elements [11.2](#) to [11.6](#) above.

Status: 

[-] 20. Recapitulation Amount Information

Status: 

[-] 20.1 Line Identifier

Status:  Character Format: aaa Data Element No. [103](#)

[-] 20.2 Total Invoice Amount details as per elements [10.2](#) to [10.4](#) above.

Status: 

Elements 20.2 thru 20.4 can be repeated.

[-] 21. AWB Recapitulation Information

Status: 

[-] 21.1 Line Identifier

Status:  Character Format: aaa Data Element No. [103](#)

[-] 21.2 Separator : Slant

Status: 

[-] 21.3 Number of AWB Details

Status: 

[-] 21.3.1 Prepaid/Collect Indicator

Status:  Character Format: a Data Element No. [403](#)

[-] 21.3.2 Domestic/International Indicator

Status:  Character Format: a Data Element No. [416](#)

[-] 21.3.3 Number (of AWBs)

Status:  Character Format: n[...4] Data Element No. [700](#)

Elements 21.2 thru 21.3 can be repeated. Can occur a maximum of two times.

[-] 21.4 Separator : Slant

Status: 

[-] 21.5 Total Number of AWB Details

Status: 

[-] 21.5.1 Prepaid/Collect Indicator

Status:  Character Format: a Data Element No. [403](#)

[-] 21.5.2 Number (of AWBs)

Status:  Character Format: n[...4] Data Element No. [700](#)

Elements 21.4 thru 21.5 can be repeated. Can occur a maximum of two times.

[-] 21.6 Separator : Slant

Status: 

[-] 21.7 Prepaid Late AWB Details

Status: 

[-] 21.7.1 Domestic/International Indicator

Status: 

Character Format: a Data Element No. [416](#)

[-] 21.7.2 Number (of AWBs)

Status: 

Character Format: n[...4] Data Element No. [700](#)

[-] 21.7.3 Separator : Slant

Status: 

[-] 21.7.4 Charge Amount

Status: 

Character Format: n[...12]p Data Element No. [501](#)

Elements 21.6 thru 21.7 can be repeated. Can occur a maximum of two times.

[-] 21.8 Separator : CRLF

Status: 

For Airlines, elements 4 thru 21 can be repeated.

For Agents, elements 5 thru 21 can be repeated.

[-] 22. Grand Total Information

Status: 

[-] 22.1 Line Identifier

Status: 

Character Format: aaa Data Element No. [103](#)

[-] 22.2 Grand Total details as per elements [10.2](#) to [11.6](#) above.

Status: 

[-] 24. Recapitulation Total Information

Status: 

[-] 24.1 Line Identifier

Status: 

Character Format: aaa Data Element No. [103](#)

[-] 24.2 Recapitulation Total Details as per elements [20.2](#) to [20.4](#) above.

Status: 

Elements 24.2 thru 24.4 can be repeated.

[-] 25. Grand AWB Recapitulation Information

Status: 

[-] 25.1 Line Identifier

Status: 

Character Format: aaa Data Element No. [103](#)

[-] 25.2 Grand Number of AWB details as per elements [21.2](#) thru [21.8](#) above.

Status: 

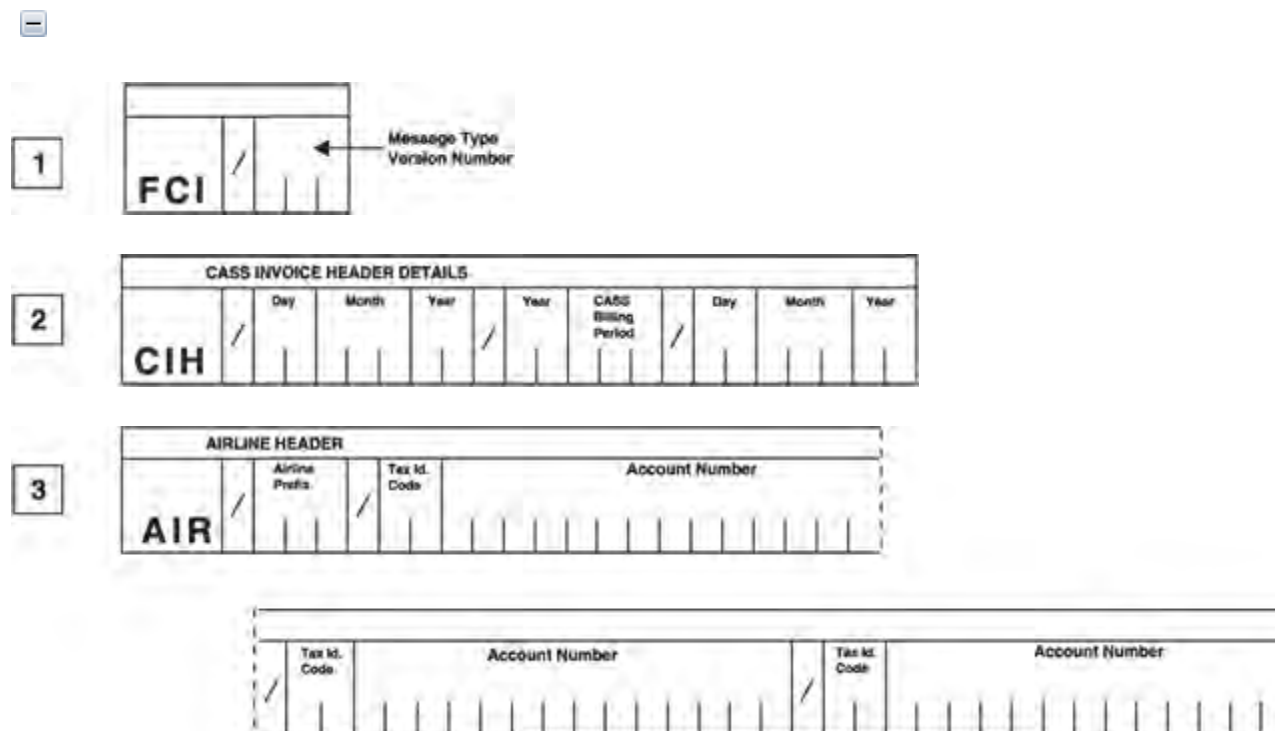

For Airlines, elements 4 thru 25 can be repeated.

For Agents, elements 5 thru 25 can be repeated.

The diagram illustrates the structure of the CCA/Adjustment Information field, showing the layout of the information field across four sections separated by dashed lines. The fields are represented as bit streams with vertical lines indicating bit positions. Arrows point to specific bit positions for the indicators.

- Section 1:** Contains the **CAI** (Charge Amount Indicator) field, followed by the **AWB Serial Number** field, and the **Charge Amount** field. The **Prepaid Collect Ind.** and **Charge Id.** fields are indicated by arrows pointing to specific bit positions within the **Charge Amount** field.
- Section 2:** Contains the **Charge Amount** field, followed by the **Credit Amount Ind.** field, and the **Charge Id.** field.
- Section 3:** Contains the **Charge Amount** field, followed by the **Credit Amount Ind.** field, and the **Charge Id.** field.
- Section 4:** Contains the **Charge Amount** field, followed by the **Credit Amount Ind.** field, and the **Charge Id.** field.

The diagram illustrates the structure of the GRAND TOTAL INFORMATION (GTI) field. The main structure is a single row with the following fields:

- GTI**: The identifier for the grand total information.
- Charge Id.**: The identifier for the charge.
- Charge Amount**: The amount of the charge.
- Credit Amount Ind.**: The indicator for the credit amount.
- Charge Id.**: The identifier for the charge.
- Charge Amount**: The amount of the charge.

A detailed view of the **Charge Amount** field shows its internal structure, which includes a dashed line indicating a specific segment.

24

The diagram illustrates the structure of the RTI (Real-time Information) data. It consists of a main horizontal bar divided into sections. The first section is labeled 'RTI'. The main bar is divided into two main sections, each labeled 'Charge Amount'. Each 'Charge Amount' section contains a series of vertical lines representing data points. Below the first 'Charge Amount' section, there is a 'Charge Id.' label with an arrow pointing to the first data point. Below the second 'Charge Amount' section, there is a 'Credit Amount Ind.' label with an arrow pointing to the first data point. Below the third 'Charge Amount' section, there is a 'Charge Id.' label with an arrow pointing to the first data point. Below the fourth 'Charge Amount' section, there is a 'Credit Amount Ind.' label with an arrow pointing to the first data point. A dashed box encloses the first two 'Charge Amount' sections, with a 'Charge Id.' label and an arrow pointing to the first data point of the first section. A 'Credit Amount Ind.' label with an arrow pointing to the first data point of the second section is also shown within the dashed box.

| GRAND AWB RECAPITULATION INFORMATION                                                                                              |   |                             |   |                      |  |                             |  |                      |   |                             |                  |                      |  |                             |   |                      |                  |                             |  |                      |   |                             |                  |                      |  |                             |   |                      |                  |                             |  |  |

## **CASS REMITTANCE (FCR) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = FCR**

### **2. MESSAGE FUNCTION**

To advise the CASS-EDI airline and the CASS-EDI agent of the total amounts due by each party.

### **3. MESSAGE APPLICATION**

Computer-to-Computer.

### **4. MESSAGE EXCHANGE PARTIES**

From: the computer access address of the CASS Settlement Office.

To: the computer access address of the CASS-EDI mailbox;  
the computer access address of a CASS-EDI airline;  
the computer access address of a CASS-EDI agent.

### **5. MESSAGE USE**

**5.1** The CASS Remittance message summarises the total amounts due by each participant in the CASS-EDI settlement process after the CASS invoice procedure has been completed.

The message is also transmitted to the CASS mailbox to advise the CASS-EDI agents and airlines of the totals amounts due.

**5.2** The CASS Remittance message may also be used for local CASS message requirements and to transmit information to the CASS Settlement Bank.

### **6. MESSAGE EXAMPLES**

**6.1** Remittance notice for one agent and more than one airline.

## DISCREPANCY ANSWER (FDA) MESSAGE

### 1. STANDARD MESSAGE IDENTIFIER = FDA

### 2. MESSAGE FUNCTION

To reply to an Advice of Discrepancy (FAD) Message to advise of action that will be taken or should be taken.

### 3. MESSAGE APPLICATION

Manual-to-Manual.

### 4. MESSAGE EXCHANGE PARTIES

From: the party to which the Advice of Discrepancy (FAD) Message was addressed.

To: either:

the Advising Office Message Address optionally indicated as Ref. [5.3](#) in the Advice of Discrepancy (FAD) Message;

or:

if not included in the FAD Message — the party (as indicated in the signature of the FAD message) from which the Advice of Discrepancy (FAD) Message was received.

### 5. MESSAGE USE

#### 5.1 Situations Where an FDA Message is Not Required

These are described in Recommended Practice 1600q.

### 6. MESSAGE EXAMPLES

#### 6.1 Reply to a “Found Cargo” discrepancy.

# DECLARATION FOR DANGEROUS GOODS DATA (FDD) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = FDD

## 2. MESSAGE FUNCTION

To transmit a complete set of “Shipper’s Declaration For Dangerous Goods” data in accordance with the IATA Dangerous Goods Regulations.

## 3. MESSAGE APPLICATION

Computer-to-Computer.

## 4. MESSAGE EXCHANGE PARTIES

From the party having the cargo in hand.  
(Computer):

To (Computer): the party receiving the cargo.

## 5. MESSAGE USE

—

## 6. MESSAGE EXAMPLES

**6.1** Non-radioactive shipment for cargo aircraft only utilising overpacks and all packed in one (see Attachment 1, [Example 1](#)).

## 8. MESSAGE NOTES

FDD1 [Ref. 1](#) The numbers shown in column DGD Box No. corresponds with the circled box numbers of the DGD form included as [ATTACHMENT 1](#).

FDD2 [Ref. 1.1](#) Due to Cargo-IMP character set restrictions, the comma cannot be transmitted. Therefore, two full stops will be used to indicate a comma within the proper shipping name, technical name or radioactive name.

FDD3 [Ref. 2.3](#)

[Ref. 21](#) A Declaration for Dangerous Goods Data can be transmitted as a sequence of FDD messages. (This is sometimes necessary due to message length constraints imposed by the transmission network).

Each individual FDD message must commence with MESSAGE IDENTIFIER and DGD HEADER. Within the DGD HEADER a message sequence number identifies the sequence in which individual messages have been transmitted.

The use of the code "CONT" (continued) in the DGD TRAILER at the end of a FDD message signifies that a further message

relating to the same Declaration for Dangerous Goods will be transmitted.

The use of the code "LAST" in the DGD TRAILER at the end of a FDD message signifies that the Declaration for Dangerous Goods transmission is complete.

- FDD20 [Ref. 3.5.4](#) Separator (if [3.5.5](#) included).
- FDD21 [Ref. 3.6](#) Coded Location

# **AWB SPACE ALLOCATION ANSWER (FFA) MESSAGE**

## **1. STANDARD MESSAGE IDENTIFIER = FFA**

## **2. MESSAGE FUNCTION**

**2.1** To reply to an AWB Space Allocation Request (FFR) Message indicating that requested space can or cannot be confirmed.

**2.2** To reply to an AWB Space Allocation Request (FFR) Message indicating that request is being processed and that further FFA message will follow.

**2.3** To reply to an AWB Space Allocation Request (FFR) Message confirming or refusing the accepted updates by showing the new space allocation details.

## **3. MESSAGE APPLICATION**

Computer-to-Computer/Manual-to-Computer/Computer-to-Manual/Manual-to-Manual.

## **4. MESSAGE EXCHANGE PARTIES**

- From (Manual): the airline controlling the requested flight(s).
- From (Computer): the access address of the cargo control computer of the airline controlling the requested flight(s).
- To (Manual): the party (as indicated in the booking reference line of the FFR message) who requested space or modifications on the flight(s).
- To (Computer): the access address of the cargo control computer (as indicated in the booking reference line of the FFR message) that requested space or modifications on the flight(s).

## **5. MESSAGE USE**

### **5.1 Multi-Airline Multi-Flight FFA Message**

An airline will reply to a multi-airline multi-flight AWB Space Allocation Request (FFR) Message using an FFA message which relates only to those space allocations on flight(s) controlled by that airline.

### **5.2 Situations Where FFA Messages May Not Be Required**

When cancellations (space allocation code "XX"), sale reports (space allocation codes "CA" and "SS") or background information (space allocation codes "HK" and "HL") are included in an AWB Space Allocation Request (FFR) Message and accepted as such, an FFA Message may be sent at the discretion of the message recipient.

## 6. MESSAGE EXAMPLES

### 6.1 Confirmation of AWB Space Allocation (code KK).

| Ref. | Message Content                         |
|------|-----------------------------------------|
| 1    | FFA/4                                   |

Diagram illustrating the structure of the alphanumeric code:

- Participant Identifier:** 10 characters (positions 1-10). Includes a slash (/) at position 1 and an upward arrow at position 4.
- Participant Code:** 70 characters (positions 11-80). Includes slashes (/) at positions 11 and 21.
- Airport/City Code:** 20 characters (positions 81-100). Includes a slash (/) at position 81.

7

[illegible]

## AIRLINE FLIGHT MANIFEST (FFM) MESSAGE

### 1. STANDARD MESSAGE IDENTIFIER = FFM

### 2. MESSAGE FUNCTION

**2.1** To notify details of consignments loaded onto a specified flight.

**2.2 (optional)** To notify details of the onward movements of consignment loaded onto a specified flight to enable transfers to be preplanned.

### 3. MESSAGE APPLICATION

Computer-to-Computer/Computer-to-Manual/Manual-to-Computer/Manual-to-Manual.

### 4. MESSAGE EXCHANGE PARTIES

From: the party generating the manifest.

To  
(Computer): the access address for the cargo control computer of the airline, shed operator or handling agent receiving the consignment.

To (Manual): the destination station office of the airline receiving the consignment.

### 5. MESSAGE USE

#### 5.1 Multi-Airport FFM

A separate FFM is normally generated for each airport of unloading and only the appropriate message is sent to each unloading point.

However, when generating an FFM to be sent to a central cargo system (which can control the distribution of the load information to each unloading point) a single FFM for multi-airports of unloading may be sent. Cargo Control systems must therefore be able to receive all of the following options:

- a series of single destination FFM messages (see note FFM1);
- a single multi destination FFM message (see note FFM2);
- a sequence of part FFM messages (see note FFM4).

### 6. MESSAGE EXAMPLES

#### 6.1 Single destination Flight Manifest with Bulk Only.

## 8. MESSAGE NOTES

FFM1 [Ref. 1](#) For a SINGLE DESTINATION flight the Airline Flight Manifest comprises:

PART 1 MESSAGE IDENTIFIER

—

PART 2 MANIFEST HEADER

—

Occurs once only per message.

Comprises elements [2.1](#) thru [2.7](#).

PART 3 DESTINATION HEADER

—

Occurs once only per message.

Comprises elements [3.1](#) thru [3.3](#).

PART 4 BULK LOADED CARGO

—

Repeated for each bulk loaded

consignment.

Comprises complete sets of consignment information (elements [4.1](#) thru [9.10](#)).

PART 5 ULD LOADED CARGO

— Repeated for each ULD.

Comprises combination sets of information describing each ULD

(elements [10.1](#) thru [11.4](#)) and each of the consignments in the ULD

(elements [12.1](#) thru [17.10](#) — repeated).

PART 6 MANIFEST TRAILER

— Occurs once only per message.

Comprises an end code identifying the:

- end of a message (notification that a further message relating to the same flight manifest will follow, see note FFM4);
- end of manifest (notification that a manifest transmission is complete).

FFM2 [Ref. 1.](#) For a MULTI-DESTINATION flight a separate airline flight manifest message is normally sent for each destination airport. However, where required a full manifest message for all consignments loaded at one point of loading may also be sent comprising:

PART 1 MESSAGE IDENTIFIER

—

PART 2 MANIFEST HEADER

— Occurs once only per message.

PART 3 DESTINATION  
— HEADER

PART 4 BULK LOADED  
— CARGO

Repeated for each  
bulk loaded  
consignment.

PART 5 ULD LOADED  
— CARGO

Repeated for each  
ULD.

PART 6 MANIFEST TRAILER

— Occurs once only per

} Repeated for  
each  
destination  
airport

message.

- FFM3 [Ref. 3.3](#) If no consignment is loaded for a particular destination airport the DESTINATION HEADER for that airport is extended to include element [3.2](#) (NIL Cargo Indication). The BULK LOADED and ULD LOADED details which would normally follow a DESTINATION HEADER are omitted.
- FFM4 [Ref. 2.1](#)  
[Ref. 18](#) An airline Flight Manifest can be transmitted as a sequence of FFM messages. (This is sometimes necessary due to message length constraints imposed by the transmission network). Each individual FFM message must commence with MESSAGE IDENTIFIER, MANIFEST HEADER and DESTINATION HEADER. In addition a ULD Detail Line must be included before any sets of consignment information relating to ULD Loaded Cargo (even if this ULD information has also been included in previous FFM messages relating to the same flight). Within the MANIFEST HEADER message sequence number identifies the sequence in which individual messages have been transmitted. The complete Consignment Detail/Consignment Onward Movement Information (elements [4.1](#) thru [9.10](#)) relating to one consignment must always be sent in one FFM message. The use of the code “CONT” (continued) in the MANIFEST TRAILER at the end of a FFM message signifies that a further message relating to the same flight manifest will be transmitted. The use of the code “LAST” in the MANIFEST TRAILER at the end of a FFM message signifies that the manifest transmission is complete.
- FFM6 [Ref. 4.3.2](#) A full description of the Shipment Description Code T, P, S and D is given in Code List, [1.15](#).
- FFM7 [Ref. 9.](#) Other Customs, Security and Regulatory Control Information  
The composition of the OCI line depends upon which Customs, Security and Regulatory Control Information Identifier is used and must be in accordance with the [OCI composition rules table below](#).
- FFM20 [Ref. 3.3](#) Nil Cargo Indication (if no cargo is loaded for this airport of unloading).
- FFM21 [Ref. 4.](#) Consignment Detail (if bulk loaded).
- FFM22 [Ref. 4.5](#) Density Group (if [4.4](#) not included).
- FFM23 [Ref.](#) Total Consignment Pieces (if [4.3.2](#) is **not** T).

# **AWB SPACE ALLOCATION REQUEST (FFR) MESSAGE**

## **1. STANDARD MESSAGE IDENTIFIER = FFR**

## **2. MESSAGE FUNCTION**

**2.1** To request that space on one or more flights be allocated for a nominated consignment.

**2.2** To request that the space allocated for a nominated consignment on one or more flights be cancelled.

**2.3** To request that the space allocated for a nominated consignment on one or more flights be cancelled and replaced by a similar space allocation on another flight(s).

**2.4** To add new information or to change/delete information to existing booking(s).

## **3. MESSAGE APPLICATION**

Computer-to-Computer/Manual-to-Computer/Computer-to-Manual/Manual-to-Manual.

## **4. MESSAGE EXCHANGE PARTIES**

From: the party requesting space on flight(s) or updating existing booking information.

To (Computer): the access address for the cargo control computer of the airline controlling the requested flight(s) or existing booking(s).

To (Manual): the departure station office of the airline operating the requested flight(s) or existing booking(s).

## **5. MESSAGE USE**

### **5.1 Multi-Airline Multi-Flight FFR Message**

A space allocation or an update to an existing booking may be requested for a movement requiring carriage by several airlines on several flights by:

**5.1.1** sending a separate “single airline” FFR message, i.e. a message listing the flight, or flights, operated by one airline on which space is requested or an existing booking updated, to each airline involved; OR

**5.1.2** copying the same “multi-airline” FFR message, i.e. a message listing all the flights on which space is requested or an existing booking updated, to each airline involved.

## **6. MESSAGE EXAMPLES**

**6.1** Request for AWB Space Allocation with alternative flight not acceptable (code NN).

## 8. MESSAGE NOTES

- FFR1 [Ref. 1.1](#) Updating Principles
- (a) Amendments permitted are shown in [FFR](#)
  - (b) The content of Ref. [2](#), [4](#), [5](#), [6](#), [8](#), [9](#), [10](#), [11](#), [12](#) and [13](#) shall override the existing booking information.
  - (c) The only changes permitted to Ref. [3](#) — Flight Details are to Ref. [3.5](#) — Space Allocation Code and Ref. [3.6.2](#) — Allotment Identification.
  - (d) In case of deletion of all ULD, SSR, OSI, DIM, PID, SHP, CNE, CUS and SRI information the ULD, SSR, OSI, DIM, PID, SHP, CNE, CUS and SRI lines will be limited to the line identifier only.
- FFR20 [Ref. 2.3](#) Quantity Detail (for which space has been requested).
- FFR21 [Ref. 2.3.3](#) Number of Pieces (can be zero).
- FFR22 [Ref. 2.5](#) Density Group (if no Volume Detail included).
- FFR23 [Ref. 3.5](#) Space Allocation Code (see Action Codes [1.7\(a\)](#) and Status Codes [1.7\(c\)](#)).  
Codes in [1.7\(c\)](#) will reflect the latest status reached.
- FFR24 [Ref. 4.5.3](#) ULD Owner Code (if [4.5.2](#) included).
- FFR25 [Ref. 7.3](#) Requesting Office Message Address (to which FFA is to be sent) (if [7.6](#) not included).
- FFR26 [Ref. 3.6](#) Allotment Identification (if Space Allocation Code (Ref. [3.5](#)) is "CA").
- FFR27 [Ref. 7.6](#) Requesting Participant Identification (to which FFA is to be sent) (if [7.3](#) not included).
- FFR28 [Ref. 7.4](#) Separator (if [7.5](#) and/or [7.6](#) included).
- FFR29 [Ref. 9.4](#) Separator (if [9.5](#) included).
- FFR30 [Ref. 9.5.2](#) Separator (if [9.5.3](#) included).

- FFR31 [Ref. 9.5.3](#) Commodity Item Number (if [9.5.1](#) = C).
- FFR32 [Ref. 9.5.3](#) ULD Rate Class Type (if [9.5.1](#) = U).
- FFR33 [Ref. 9.5.3](#) Rate Class Code (Basis) Class Rate Percentage (if [9.5.1](#) = R or S).
- FFR34 [Ref. 10.6.4](#) Separator (if [10.6.5](#) included).
- FFR35 [Ref. 10.7](#) Coded Location.
- [Ref. 10.8](#) Contact Detail (total characters of [10.7](#) thru [10.8](#) cannot exceed 69).
- FFR36 [Ref. 10.7.3](#) Separator (if [10.7.4](#) and/or [10.8](#) included).
- FFR37 [Ref. 11.6.4](#) Separator (if [11.6.5](#) included).
- FFR38 [Ref. 11.7](#) Coded Location.
- [Ref. 11.8](#) Contact Detail (total characters of [11.7](#) thru [11.8](#) cannot exceed 69).
- FFR39 [Ref. 11.7.3](#) Separator (if [11.7.4](#) and/or [11.8](#) included).
- FFR40 [Ref. 12.2](#) Account Detail (only if customer is an agent).
- FFR41 [Ref. 12.2.5](#) Separator (if [12.2.6](#) and/or [12.2.8](#) included).
- FFR42 [Ref. 12.2.7](#) Separator (if [12.2.8](#) included).
- FFR43 [Ref. 13.3](#) Reference Number (must be included if [13.5](#) and [13.7](#) not included but may be included with [13.5](#) and/or [13.7](#)).
- FFR44 [Ref. 13.4](#) Separator (if [13.5](#) and/or [13.7](#) included).
- FFR45 [Ref. 13.5](#) Supplementary Shipment Information (must be included if [13.3](#) and [13.7](#) not included but may be included with [13.3](#) and/or [13.7](#)).
- FFR46 [Ref. 13.6](#) Separator (if [13.7](#) included).
- FFR47 [Ref. 13.7](#) Supplementary Shipment Information (must be included if [13.3](#) and [13.5](#) not included but may be included with [13.3](#) and/or [13.5](#)).

FFR48 [Ref. 2.8](#) Separator (if [2.9](#) included).

## **FREIGHT TRANSACTION (FFT) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = FFT**

### **2. MESSAGE FUNCTION**

To advise the CASS Settlement Office of specific Air Waybill transaction data received by the CASS-EDI airline from a CASS-EDI cargo agent.

### **3. MESSAGE APPLICATION**

Computer-to-Computer.

### **4. MESSAGE EXCHANGE PARTIES**

From: the computer access address of a CASS-EDI airline.

To: the computer access address of the CASS-EDI mailbox;  
the computer access address of a CASS-EDI agent.

### **5. MESSAGE USE**

The Freight Transaction message is transmitted by a CASS-EDI airline to the CASS-EDI mailbox to begin the CASS-EDI settlement process when the FWB message does not include net billing information.

The CASS-EDI mailbox may further transmit the message to the appropriate CASS-EDI agent.

The Freight Transaction message may be used in conjunction with the Adjustment Request (FAR) and the Airline Confirmation (FAC) messages to agree "net amounts" or to adjust other amounts, i.e. the adjustment process, prior to the CASS invoicing procedure.

Alternatively, the message may be transmitted by the CASS-EDI airline to the CASS-EDI mailbox after the adjustment process has been completed by the CASS-EDI airline and CASS-EDI agent.

The message may be used on a transaction-by-transaction basis or on a list basis.

### **6. MESSAGE EXAMPLES**

#### **6.1 Advise of a freight transaction.**

## 8. MESSAGE NOTES

- FHL1 [Ref. 1](#) For a multi-part FHL message that breaks in the middle of House Waybill data, subsequent parts must also include the previous occurrence of Ref. [3](#) following the standard previous SMI and first line of SMT to correctly associate the data with the appropriate House Waybill and Master Air Waybill.

- FHL2 [Ref. 6.](#) Other Customs, Security and Regulatory Control Information  
The composition of the OCI line depends upon which Customs, Security and Regulatory Control Information Identifier is used and must be in accordance with the [OCI composition rules table below](#).
- FHL20 [Ref. 4.](#) Free Text Description of Goods (when interchanging with US Customs, the total characters of Ref. [4](#) cannot exceed 545).
- FHL21 [Ref. 7.5.4](#) Separator (if [7.5.5](#) included).
- FHL22 [Ref. 7.6](#) Coded Location  
[Ref. 7.7](#) Contact Details  
(total characters of [7.6](#) through [7.7](#) cannot exceed 69).
- FHL23 [Ref. 7.6.3](#) Separator (if [7.6.4](#) and/or [7.7](#) included).
- FHL24 [Ref. 8.](#) Consignee Name and Address (if Ref. [7](#) included).
- FHL25 [Ref. 8.5.4](#) Separator (if [8.5.5](#) included).
- FHL26 [Ref. 8.7](#) Coded Location  
[Ref. 8.8](#) Contact Detail  
(total characters of [8.7](#) through [8.8](#) cannot exceed 69).
- FHL27 [Ref. 8.7.3](#) Separator (if [8.7.4](#) and/or [8.8](#) included).
- FHL28 [Ref. 5](#) Harmonised Tariff Schedule Information May only be included as respective, additional information to Ref.[4](#) Free Text Description of Goods.
- FHL29 [Ref. 3.9](#) Separator (if [3.10](#) included).
- FHL30 [Ref. 6.3](#) ISO Country Code  
[Ref. 6.5](#) Information Identifier  
[Ref. 6.7](#) Customs Information Identifier  
(At least one of Ref. [6.3](#)., Ref. [6.5](#). or Ref. [6.7](#). must be included).

### 8.8.1 OCI composition rules table

| ISO | Information | Customs, | Explanatory notes on allowed values for |
|-----|-------------|----------|-----------------------------------------|
|-----|-------------|----------|-----------------------------------------|

| Country Code | Identifier | Security and Regulatory Control Information Identifier | the Information Identifier and completion examples. Any Screening Method, Screening Exemption or Security Status codes are to be included in the Supplementary Customs, Security and Regulatory Control Information and not in the Information Identifier.                                                                                                                                  |

# PIECE MANIFEST REQUEST (FMR) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = FMR

## 2. MESSAGE FUNCTION

To request a Piece Manifest (FPM) message providing individual piece identification numbers.

## 3. MESSAGE APPLICATION

Computer-to-Computer/Manual-to-Computer.

## 4. MESSAGE EXCHANGE PARTIES

From: the party providing piece level tracking.

To: the party requiring piece level tracking.

## 5. MESSAGE USE

Airlines will send this message to:

- Shippers or Forwarders who expect tracking of their consignments at the piece level;
- other airlines when interlining occurs and the piece level tracking service needs to be maintained.

## 6. MESSAGE EXAMPLES

### 6.1 A manifest request for the individual piece numbers for an air waybill.

| Ref. | Message Content    |
|------|--------------------|
| 1    | FMR/1              |
| 2    | API/R/777-12345675 |

### 6.2 A manifest request for the individual piece numbers for a house waybill.

| Ref. | Message Content    |
|------|--------------------|
| 1    | FMR/1              |
| 2    | API//777-12345675  |
| 3    | HPI/R/AEI111133333 |

### 6.3 A manifest request for the identification codes of ULDs.

| Ref. | Message Content   |
|------|-------------------|
| 1    | FMR/1             |
| 2    | API//777-12345675 |

|   |       |
|---|-------|
| 4 | ULD/R |
|---|-------|

**6.4** A manifest request for the unique piece numbers for pieces contained within a ULD.

| Ref. | Message Content   |
|------|-------------------|

## 8. MESSAGE NOTES

Authorisation (for embargo change).

## 9. CANCELLATION OF EMBARGO MESSAGE LAYOUT

## ERROR (FNA) MESSAGE

### 1. STANDARD MESSAGE IDENTIFIER = FNA

### 2. MESSAGE FUNCTION

To notify the Sender of a message that an error has been detected in a message.

### 3. MESSAGE APPLICATION

Computer-to-Computer/Computer-to-Manual/Manual-to-Computer/Manual-to-Manual.

### 4. MESSAGE EXCHANGE PARTIES

From: the participant detecting the error.

To: the sender of message.

### 5. MESSAGE USE

When errors are detected in messages transmitted in a batch environment, only those messages that contain errors are transmitted back to the sender.

### 6. MESSAGE EXAMPLES

#### 6.1 Errors detected in FFR Message.

| Ref. | Message Content                                                                      |

## ALLOTMENT INFORMATION ANSWER (FOA) MESSAGE

### 1. STANDARD MESSAGE IDENTIFIER = FOA

### 2. MESSAGE FUNCTION

To provide the status of an allotment(s) or a list of allotments.

### 3. MESSAGE APPLICATION

Computer-to-Computer/Computer-to-Manual.

### 4. MESSAGE EXCHANGE PARTIES

From: the access address for the cargo control computer of the airline providing and controlling the allotment(s).

To (Computer): the access address of the cargo control computer of the party provided the allotment(s).

To (Manual): the party provided the allotment(s) and/or requesting the information.

### 5. MESSAGE USE

The Allotment Information Answer (FOA) message may be used to provide status for single or multiple allotments on various flights, days and routings.

### 6. MESSAGE EXAMPLES

**6.1** A response indicating the portion remaining, and the portion used, of a single allotment.

| Ref. | Message Content                                                                                                                                  |

Allotment Status Code

## ALLOTMENT INFORMATION REQUEST (FOR) MESSAGE

### 1. STANDARD MESSAGE IDENTIFIER = FOR

### 2. MESSAGE FUNCTION

To request the status of an allotment(s) or current allotment information.

### 3. MESSAGE APPLICATION

Computer-to-Computer/Computer-to-Manual.

### 4. MESSAGE EXCHANGE PARTIES

From: the party provided the allotment(s).  
To the access address for the cargo control computer of the  
(Computer): airline providing and controlling the allotment(s).  
To the departure station office of the airline operating the  
(Manual): requested allotment list.

### 5. MESSAGE USE

The Allotment Information Request (FOR) message may be used to request status for single or multiple allotments on various flights, days and routings.

### 6. MESSAGE EXAMPLES

#### 6.1 A request for the status of a single allotment.

| Ref. | Message Content                     |
|------|-------------------------------------|
| 1    | FOR/2                               |

## **PIECE MANIFEST (FPM) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = FPM**

### **2. MESSAGE FUNCTION**

**2.1** To provide individual piece identification numbers to a carrier.

**2.2** To reply to a Piece Manifest Request (FPR) message.

### **3. MESSAGE APPLICATION**

Computer-to-Computer/Manual-to-Computer.

### **4. MESSAGE EXCHANGE PARTIES**

From: the party requiring piece level tracking.

To: the party providing piece level tracking.

### **5. MESSAGE USE**

**5.1** Shippers or Forwarders who expect tracking of their consignments at the piece level will send this message to the airline responsible for the shipment.

**5.2** Airlines that provide tracking of their customers' consignments at the piece level will forward this message to other airlines when interlining occurs.

### **6. MESSAGE EXAMPLES**

**6.1** Piece manifest indicating unique piece numbers for a house waybill consignment loaded in a ULD.

| <b>Ref.</b> | <b>Message Content</b>  |
|-------------|-------------------------|
| 1           | FPM/1                   |

# SHIPMENT CHARGE CALCULATION ANSWER (FQA) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = FQA

## 2. MESSAGE FUNCTION

To reply to a Shipment Charge Calculation Request (FQR) Message indicating the charge calculated.

## 3. MESSAGE APPLICATION

Computer-to-Computer/Computer-to-Manual.

## 4. MESSAGE EXCHANGE PARTIES

From: the access address of the cargo control computer of the party to which the Shipment Charge Calculation Request (FQR) Message was addressed.

To (Computer): the access address of the cargo control computer of the cargo agent from which the Shipment Charge Calculation Request (FQR) Message was sent.

To (Manual): the cargo agent from which the Shipment Charge Calculation Request (FQR) Message was sent.

## 5. MESSAGE USE

—

## 6. MESSAGE EXAMPLES

### 6.1 Charge Calculation Positive Answer.

8.3 Other Service Information

Status: **M**

Character Format: t[...65]

Data Element No. [405](#)

8.4 Separator : CRLF

Status: **M**

Elements 8.2 thru 8.4 can be repeated. Can occur a maximum of two times.

## 8. MESSAGE NOTES

FQA1 [Ref. 1.](#) Due to their complexity the rating lines will be presented the same way as in the FWB Message.

FQA2 [Ref. 1.](#) For the time being in order to keep the FQA Message as simple as possible, the shipment calculation will exclude the Class Rates possibilities and ULD Discount.

FQA3 [Ref. 1.](#) The various possibilities in regard of each Rate Class Code or group of [1.](#) Rate Class Codes are represented on the matrix below:

| Number of Pieces (Ref. <a href="#">5.5</a> ) | Weight Code and Weight (Ref. <a href="#">5.7/5.8</a> ) | Rate Class Code (Ref. <a href="#">5.10</a> ) | Commodity Item Number (Ref. <a href="#">5.12</a> ) | Weight (Ref. <a href="#">5.14</a> ) | Rate or Charge (Ref. <a href="#">5.16</a> ) | Charge Amount (Ref. <a href="#">5.18</a> )                  |
|----------------------------------------------|--------------------------------------------------------|----------------------------------------------|----------------------------------------------------|-------------------------------------|---------------------------------------------|-------------------------------------------------------------|
| Number of Pieces                             | Weight Code and Weight (Gross)                         | M                                            | —                                                  | Weight (Chargeable)                 | Charge (Minimum)                            | Ref. <a href="#">5.16</a>                                   |
| Number of Pieces                             | Weight Code and Weight (Gross)                         | N                                            | —                                                  | Weight (Chargeable)                 | Rate (applicable per unit of weight)        | Ref. <a href="#">5.14</a><br>X<br>Ref. <a href="#">5.16</a> |

# SHIPMENT CHARGE CALCULATION REQUEST (FQR) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = FQR

## 2. MESSAGE FUNCTION

To request a shipment charge calculation for a specific date.

## 3. MESSAGE APPLICATION

Computer-to-Computer/Manual-to-Computer.

## 4. MESSAGE EXCHANGE PARTIES

From the cargo agent requesting the charge calculation.  
(Manual):

From the access address of the cargo control computer of the  
(Computer): cargo agent requesting the charge calculation.

To: the access address of the cargo control computer of the  
party responsible for the charge calculation.

## 5. MESSAGE USE

—

## 6. MESSAGE EXAMPLES

### 6.1 Charge Calculation Request.

# SUPPLEMENTARY RATE INFORMATION REQUEST (FRR) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = FRR

## 2. MESSAGE FUNCTION

To request the description corresponding to:

- a specific Rate Note;
- a specific Commodity Item Number;
- a specific ULD Charge Code.

## 3. MESSAGE APPLICATION

Computer-to-Computer.

## 4. MESSAGE EXCHANGE PARTIES

From: the access address of the cargo control computer of the cargo agent requesting a description.

To: the access address of the cargo control computer of the party responsible for the display of the description.

## 5. MESSAGE USE

—

## 6. MESSAGE EXAMPLES

### 6.1 Request for a Rate Note.

## STATUS ANSWER (FSA) MESSAGE

### 1. STANDARD MESSAGE IDENTIFIER = FSA

### 2. MESSAGE FUNCTION

To reply to a Status Request (FSR) Message indicating latest status, or statuses, in the movement of the nominated consignment.

### 3. MESSAGE APPLICATION

Computer-to-Computer/Computer-to-Manual/Manual-to-Manual.

### 4. MESSAGE EXCHANGE PARTIES

- From (Manual): the airline, shed operator or handling agent to which the Status Request (FSR) Message was addressed.
- From (Computer): the access address of the cargo control computer of the airline, shed operator, or handling agent actioning the consignment movement.
- To (Computer): the access address of the cargo control computer (as indicated in the signature of the FSR Message) from which the Status Request (FSR) Message was sent.
- To (Manual): the party (as indicated in the signature of the FSR message) from which the Status Request (FSR) Message was received.

### 5. MESSAGE USE

—

### 6. MESSAGE EXAMPLES

#### 6.1 Consignment physically received from a shipper or an agent.

| Ref. | Message Content                   |
|------|-----------------------------------|
| 1    | FSA/15                            |
| 2    | 020-12345675JFKBKK/T20            |
| 3    | RCS/10JUL1800/JFK/T20/SHIPPERNAME |

#### 6.2 Consignment received from another airline.

| Ref. | Message Content          |
|------|--------------------------|
| 1    | FSA/15                   |
| 2    | 057-12345675IAHJED/T20   |
| 4    | RCT/TW/12NOV1900/CDG/T20 |

**6.3** Consignment physically received from a given flight or surface transport of the given airline.

| Ref. | Message Content             |
|------|-----------------------------|
| 1    | FSA/15                      |

# **SUBSTITUTE AIR WAYBILL DATA (FSB) MESSAGE**

## **1. STANDARD MESSAGE IDENTIFIER = FSB**

## **2. MESSAGE FUNCTION**

**2.1** To transmit available Air Waybill data in response to a FWR message.

**2.2** To transmit available Air Waybill data from one participant involved in the movement of a consignment to another participant.

## **3. MESSAGE APPLICATION**

Computer-to-Computer/Computer-to-Manual/Manual-to-Computer/Manual-to-Manual.

## **4. MESSAGE EXCHANGE PARTIES**

From (Manual): the originating (or any other) participant involved in the movement of a consignment.

From (Computer): the access address of the Cargo Control Computer of the originating (or any other) participant involved in the movement of a consignment.

To (Manual): the Message Address of the requestor as indicated in the last line of the FWR message.

To (Computer): the access address of the Cargo Control Computer of the FWR requestor or any other participant.

## **5. MESSAGE USE**

### **5.1 Computer Environment**

To provide all available Air Waybill data when complete Air Waybill data is not available.

### **5.2 Manual Environment**

To provide Air Waybill data according to the Cargo Services Conference Resolutions Manual, Recommended Practice 1600s.

## **6. MESSAGE EXAMPLES**

### **6.1 Substitute Air Waybill Data.**

## **MULTIPLE STATUS UPDATE LIST (FSL) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = FSL**

### **2. MESSAGE FUNCTION**

To notify a handled airline with details of the consignments which have achieved a certain status over a set period as recorded in the system of a handling party (airline, handling agent).

### **3. MESSAGE APPLICATION**

Computer-to-Computer/Computer-to-Manual.

### **4. MESSAGE EXCHANGE PARTIES**

From: the handling party (an airline, a handling agent).  
To the access address of the Cargo Control Computer of the  
(Computer): handled airline.  
To the handled airline at a predesignated address.  
(Manual):

### **5. MESSAGE USE**

When to send an FSL — an FSL must be sent automatically at agreed intervals.

### **6. MESSAGE EXAMPLES**

#### **6.1 List of deliveries.**

## STATUS REQUEST (FSR) MESSAGE

### 1. STANDARD MESSAGE IDENTIFIER = FSR

### 2. MESSAGE FUNCTION

To request current status of a nominated consignment.

### 3. MESSAGE APPLICATION

Computer-to-Computer/Manual-to-Computer/Manual-to-Manual.

### 4. MESSAGE EXCHANGE PARTIES

From: the party requesting the status of a consignment.

To (Computer): the access address for the cargo control computer of the airline, shed operator, or handling agent actioning the consignment movement.

To (Manual): the local office of the airline, shed operator or handling agent actioning the consignment movement.

### 5. MESSAGE USE

—

### 6. MESSAGE EXAMPLES

#### 6.1 Request with the minimum of information.

| Ref. | Message Content |
|------|-----------------|
| 1    | FSR             |
| 2    | 085-22110001    |

#### 6.2 Request for the status of a part of a consignment.

| Ref. | Message Content     |
|------|---------------------|
| 1    | FSR                 |
| 2    | 085-22120000/P12T20 |

#### 6.3 Request with full movement information supplied (to assist manual tracing action).

## STATUS UPDATE (FSU) MESSAGE

### 1. STANDARD MESSAGE IDENTIFIER = FSU

### 2. MESSAGE FUNCTION

To notify/update interested parties with a (change of) status of a specified consignment as recorded in the system of a handling party.

### 3. MESSAGE APPLICATION

Computer-to-Computer/Computer-to-Manual.

### 4. MESSAGE EXCHANGE PARTIES

From: the handling party (airline, handling agent ...).  
To the access address of the Cargo Control Computer of the  
(Computer): Interested Party.  
To the pre-destined address of the Interested Party.  
(Manual):

### 5. MESSAGE USE

**5.1** When to send an FSU — an FSU is sent, by bilateral agreement, for a shipment or each part of shipment after a specified status has been recorded in the Handling Party's system for that particular shipment or part shipment.

**5.2** The format of the FSU Message is the same as the [FSA](#) Message except that the FSU Message can only be used as follows:

- for one non-repeatable status **or** the Other Customs, Security Control and Regulatory Control Information (OCI) line and may be accompanied by the optional ULD description
- for one non-repeatable status **and** accompanied by the optional Other Customs, Security Control and Regulatory Control Information (OCI) line and/or ULD description.

The Note FSA52 does not apply.

### 6. MESSAGE EXAMPLES

**6.1** Consignment delivered to consignee or his agent.

| Ref. | Message Content                   |
|------|-----------------------------------|
| 1    | FSU/15                            |

# RATE INFORMATION REQUEST (FTR) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = FTR

## 2. MESSAGE FUNCTION

To request Rate Information for a specific routing on a specific date.

## 3. MESSAGE APPLICATION

Computer-to-Computer.

## 4. MESSAGE EXCHANGE PARTIES

From: the access address of the cargo control computer of the cargo agent requesting the Rate Information.

To: the access address of the cargo control computer of the party responsible for the display of the Rate Information.

## 5. MESSAGE USE

—

## 6. MESSAGE EXAMPLES

### 6.1 Request for All Rates.

# ULD SPACE ALLOCATION ANSWER (FUA) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = FUA

## 2. MESSAGE FUNCTION

**2.1** To reply to a ULD Space Allocation Request (FUR) Message indicating that requested space can or cannot be confirmed.

**2.2** To reply to a ULD Space Allocation Request (FUR) Message indicating that request is being processed and that a further FUA message will follow.

## 3. MESSAGE APPLICATION

Manual-to-Manual.

## 4. MESSAGE EXCHANGE PARTIES

From: the airline controlling the requested flight(s).

To: the party (as indicated in the last line of the FUR message) who requested space on the flight(s).

## 5. MESSAGE USE

### 5.1 Multi-Airline Multi-Flight FUA Message

An airline will reply to a multi-airline multi-flight ULD Space Allocation Request (FUR) Message using a FUA message which relates only to those space allocations on flight(s) controlled by that airline.

### 5.2 Situation Where FUA Messages Are Not Required

When cancellation (allocation action code "XX"), sale reports (allocation action codes "CA" and "SS") and background information (allocation action codes "HK" and "HL") are included in a ULD Space Allocation Request (FUR) Message, there is no need for an acknowledgement by a FUA message.

## 6. MESSAGE EXAMPLES

### 6.1 Confirmation of ULD Space Allocation (code KK).

| Ref. | Message Content       |
|------|-----------------------|
| 1    | FUA/1                 |

# UNIT LOAD DEVICE MANIFEST (FUM) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = FUM

## 2. MESSAGE FUNCTION

**2.1** The Electronic representation of a ULD Tag at ULD build up (Export), i.e.:

- to notify details of consignments (air waybills and/or house air waybills) loaded into a specific Unit Load Device (= ULD); or
- to notify details of cargo loaded or empty ULD loaded on or into another ULD (e.g. sub ULDs in main ULDs, piggybacked ULDs or pallet stacks).

**2.2** (optional) To notify details of consignments loaded into a specific ULD to enable transfers to be preplanned.

## 3. MESSAGE APPLICATION

Computer-to-Computer/Computer-to-Manual/Manual-to-Manual.

## 4. MESSAGE EXCHANGE PARTIES

From: the party generating the manifest (ULD Tag) or accepting a Shipper built unit (BUP), in general a General Handling Agent.

To (Computer): the access address for the cargo control computer of the airline.

To: (Manual): the station office (office function designator = FF) of the airline where the Unit Load Device was created/accepted.

## 5. MESSAGE USE

A FUM is generated wherever a Unit Load Device is being built up (be it with cargo or without) in conjunction to the creation of a ULD Tag (or group of Tags in the case sub ULDs were used). The time stamp of ULD Build up event (= preparation) is kept in the ULD Manifest Header (see [Part 2](#)).

A FUM message allows airlines to get immediately notified of cargo and ULD build up at export stations. One FUM message shall be generated per main ULD (a main ULD might contain sub ULDs).

For the physical preparation of cargo to be loaded in the aircraft bulk hold a fictitious ULD number may be used, e.g. BLK00000CV, for internal use only. In practice, the combination of all generated FUM messages for one flight could correspond to the later sent FFM and UCM messages for this flight).

Correction of the FUM message shall be handled in overwrite mode, i.e. the last message will always count.

## 6. MESSAGE EXAMPLES

**6.1** One main ULD including two sub ULDs and being connected to another ULD, which contains empty ULDs only.

## 8.1

A ULD Manifest can be transmitted as a sequence of FUM messages. (This is sometimes necessary due to message length constraints imposed by the transmission network).

Each individual FUM message must commence with MESSAGE IDENTIFIER, ULD MANIFEST HEADER, ULD DESTINATION HEADER.

In addition, either an Empty Equipment in Compartment line (Ref. [8.](#)) or a Consignment Detail line (Ref. [9.](#)) must be included in the message.

The Consignment detail line might (should) also include any optional Dimensions, Consignment Onward Movement, Movement Priority Information, Handling Information, Other Service Information and Special Customs Information lines (if available), which must be included before any sets of House waybill information even if this Consignment related information has also been included in previous FUM messages.

Each individual FUM Message will always end with a MANIFEST COMPLETE INDICATOR.

### 8.8.1 OCI composition rules table

| ISO Country Code | Information Identifier | Customs, Security and Regulatory Control Information Identifier | Explanatory notes on allowed values for the Information Identifier and completion examples. Any Screening Method, Screening Exemption or Security Status codes are to be included in the Supplementary Customs, Security and Regulatory Control Information and not in the Information Identifier. |

Customs, Security and Regulatory Control Information Identifier

The diagram illustrates the layout of the 10-byte data structure. It is divided into four main sections:

- ISO Country Code:** 2 bytes.
- Information Identifier:** 2 bytes.
- Separator:** 1 byte.
- SUPPLEMENTARY CUSTOMS, SECURITY AND REGULATORY CONTROL INFORMATION:** 5 bytes.

An arrow points to the first byte of the 5-byte information section, identifying it as the **Customs, Security and Regulatory Control Information Identifier**.

MANIFEST COMPLETE INDICATOR

End of Message Code

# **ULD SPACE ALLOCATION REQUEST (FUR) MESSAGE**

## **1. STANDARD MESSAGE IDENTIFIER = FUR**

## **2. MESSAGE FUNCTION**

**2.1** To request that ULD space on one or more flights be allocated against a unique request identifier.

**2.2** To request that ULD space on one or more flights be cancelled.

**2.3** To request that the ULD space allocated on one or more flights be cancelled and replaced by a similar space allocation on another flight(s).

## **3. MESSAGE APPLICATION**

Manual-to-Manual.

## **4. MESSAGE EXCHANGE PARTIES**

From: the party requesting space on flight(s).

To: the departure station office of the airline operating the requested flight(s).

## **5. MESSAGE USE**

### **5.1 Multi-Airline Multi-Flight FUR Message**

A ULD space allocation may be requested for a movement requiring carriage by several airlines on several flights by:

**5.1.1** sending a separate “single airline” FUR message, i.e. a message listing the flight, or flights, operated by one airline on which space is requested, to each airline involved;  
OR

**5.1.2** copying the same “multi airline” FUR message, i.e. a message listing all the flights on which space is requested, to each airline involved.

### **5.2 ULD Space Allocation Request Identification**

An FUR message is a space allocation request for multiple consignments contained in one or more ULDs. As the request cannot be linked to a single air waybill reference, a single “Booking File Reference” is used (see Message Ref. [2.1](#)).

### **5.3 Situation Where an FUR Message is Not Required**

Where a space allocation is required for a single consignment contained in one or more ULDs, an AWB Space Allocation Request (FFR) Message must be used.

## 6. MESSAGE EXAMPLES

### 6.1 Request for ULD Space Allocation with alternative not accepted (code NN).

| Ref. | Message Content       |
|------|-----------------------|
| 1    | FUR/3                 |
| 2    | /1/K1000/CARVINGS     |
| 3    | LH444/22MAR/FRAYMX/NN |
| 4    | ULD/1/P1G1234BA/K1000 |
| 7    | REF/NB0FQKQ           |

### 6.2 Request for ULD Space Allocation with alternative flight acceptable (code NA).

| Ref. | Message Content       |

## 8. MESSAGE NOTES

FUR1 [Ref. 2.1](#) The initial ULD Space Allocation Request (FUR) Message does not include a “Booking File Reference”. This reference is issued by the airline when allocating the requested ULD space. FUR Messages requesting flight amendments and all FUA answer messages must include this “Booking File Reference”.

FUR20 [Ref. 2.2](#) ULD Quantity (for which space has been requested).

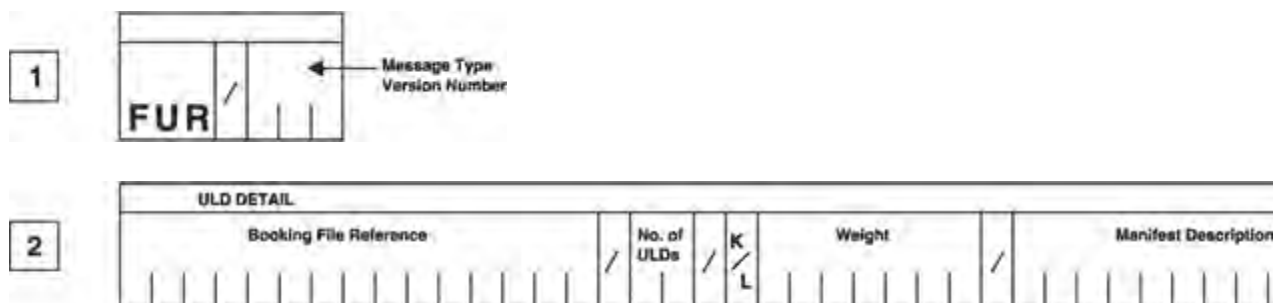

FUR21 [Ref. 3.5](#) Space Allocation Code (see Code List, [1.7\(a\)](#) and [1.7\(c\)](#)).

FUR22 [Ref.](#) ULD Owner Code (if [4.5.2](#) included).  
[4.5.3](#)

## **SCHEDULE AND AVAILABILITY INFORMATION ANSWER (FVA) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = FVA**

### **2. MESSAGE FUNCTION**

To reply to a Schedule and Availability Information Request (FVR) Message indicating the schedule and availability information selected. Availability information will be provided at the option of the party, i.e. carrier, being requested for this information.

### **3. MESSAGE APPLICATION**

Computer-to-Computer.

### **4. MESSAGE EXCHANGE PARTIES**

From: the access address of the cargo control computer of the party to which the Schedule and Availability Information Request (FVR) Message was addressed.

To: the access address of the cargo control computer of the cargo agent from which the Schedule and Availability Information Request (FVR) Message was sent.

### **5. MESSAGE USE**

—

### **6. MESSAGE EXAMPLES**

#### **6.1 Schedule and Availability Information for specific flight.**

| <b>Ref.</b> | <b>Message Content</b>                   |
|-------------|------------------------------------------|
| 1           | FVA/2                                    |

## 8. MESSAGE NOTES

FVR1 [Ref. 2.](#) In order to limit the volume of information to be transmitted in the Answer Message, optional data elements may be included in the Request Message.

The matrix below illustrates the possible combinations:

| Data Element              | Schedule Request |             | Availability Request |               |
|---------------------------|------------------|-------------|----------------------|---------------|
|                           | For a Date       | For a Month | For a Flight         | For a Routing |
| ICAO Carrier Code         | X                | X           | X                    | X             |
| Flight Number             | —                | —           | X                    | —             |
| Earliest Departure Time   | X                | —           | —                    | X             |
| Latest Arrival Date/Time  | X                | —           | —                    | X             |
| Connection Restriction    | X                | X           | —                    | X             |
| Aircraft Possibility Code | X                | X           | —                    | X             |
| Service Code              | X                | X           | —                    | X             |
| Weight                    | —                | —           | —                    | X             |
| Volume                    | —                | —           | —                    | X             |

- FVR20 [Ref. 2.5](#) Date  
When a Day of Month is not specified, schedule is being requested for a specific month.  
When a Day of Month is specified, schedule and availability is being requested for a specific date.
- FVR21 [Ref.](#) Separator (if one of [2.7](#), [2.9](#), [2.11](#), [2.13](#) or [2.15](#) included).

## [2.6](#)

FVR22 [Ref.](#)  
[2.7](#)

### Carrier/Flight

When a Flight Number is not specified, schedule and availability is being requested for a routing:

- comprising the flights of all airlines when a Carrier Code is not specified;
- comprising only the flights (or first flights in case of combinations) of a specified airline when a Carrier Code is specified.

When a Flight Number is specified, schedule and availability is being requested for this flight only.

FVR23 [Ref.](#)  
[2.8](#)

Separator (if one of [2.9](#), [2.11](#), [2.13](#) or [2.15](#) included).

FVR24 [Ref.](#)  
[2.9](#)

### Earliest Departure Time

When an Earliest Departure Time is not specified, schedule and availability is being requested for all flights (or first flights in case of combinations) departing from 00h00.

When an Earliest Departure Time is specified, schedule and availability is being requested for flights (or first flights in case of combinations) departing from the specified time.

FVR25 [Ref.](#)  
[2.10](#)

Separator (if one of [2.11](#), [2.13](#) or [2.15](#) included).

FVR26 [Ref.](#)  
[2.11](#)

### Latest Arrival Date/Time

When a Latest Arrival Date/Time is not specified, schedule and availability is being requested for all flights.

When the Latest Arrival Date is specified and the Latest Arrival Time is not specified, schedule and availability is being requested for those flights (or last flights in case of combinations) that arrive at the destination no later than 23h59 on the specified date.

When both the Latest Arrival Date and Time are specified, schedule and availability is being request for those flights (or last flights in case of combinations) that arrive at the destination no later than the specified date/time.

FVR27 [Ref.](#)  
[2.12](#)

Separator (if one of [2.13](#) or [2.15](#) included).

FVR28 [Ref.](#)  
[2.13](#)

### Connection Restriction

The various possible combinations of connections requested are precised in the matrix below:

| Connection Restriction Indicator | Airport Code | City Code | Connection Requested |
|----------------------------------|--------------|-----------|----------------------|
|                                  |              |           |                      |

|   |   |   |                                                          |
|---|---|---|----------------------------------------------------------|
| — | — | — | All connections requested.                               |
| N | — | — | No connections requested.                                |
| L | X | — | Only the connections via this airport are requested.     |
| L | — | X | Only the connections via this City are requested.        |
| E | X | — | All connections requested except those via this airport. |
| E | — | X | All connections requested except those via this city.    |

- FVR29 [Ref. 2.13.2](#) Airport/City Code (if [2.13.1](#) is L or E).
- FVR30 [Ref. 2.14](#) Separator (if [2.15](#) included).
- FVR31 [Ref. 2.15](#) Aircraft Possibility Code  
When an Aircraft Possibility Code is not specified, schedule and availability is being requested for all aircraft possibilities.  
When an Aircraft Possibility Code is specified, schedule and availability is being requested for the specified aircraft possibility only.
- FVR32 [Ref. 2.17](#) Separator (if one of [2.18](#), [2.20](#) or [2.22](#) included).
- FVR33 [Ref. 2.18](#) Service Code  
When a Service Code is not specified, schedule and availability is being requested for all flights offering all service codes possibilities.  
When a Service Code is specified, schedule and availability is being requested on flights offering the specified service code.
- FVR34 [Ref. 2.19](#) Separator (if either [2.20](#) or [2.22](#) included).

- FVR35 [Ref. 2.20](#) Weight  
 When a Weight is not specified, availability is being requested for all flights with all weight availability.  
 When a Weight is specified, availability is being requested on those flights with the specified weight available.
- FVR36 [Ref. 2.21](#) Separator (if [2.22](#) included).
- FVR37 [Ref. 2.22](#) Volume  
 When a Volume is not specified, availability is being requested for all flights with all volume availability.  
 When a Volume is specified, availability is being requested on those flights with the specified volume available.
- FVR38 [Ref. 2.23](#) Separator (if one of [2.18](#), [2.20](#) or [2.22](#) included).

## **AIR WAYBILL DATA (FWB) MESSAGE**

### **1. STANDARD MESSAGE IDENTIFIER = FWB**

### **2. MESSAGE FUNCTION**

To transmit a complete set of Air Waybill data in accordance with the Cargo Services Conference Resolutions Manual.

### **3. MESSAGE APPLICATION**

Computer-to-Computer.

### **4. MESSAGE EXCHANGE PARTIES**

From: the access address of the Cargo Control Computer of a participant involved in the movement of a consignment.  
To the access address of the Cargo Control Computer of a participant involved in the movement of a consignment.  
(Computer):  
To (Manual): the message address of the requestor for Air Waybill data as indicated in the last line of the FWR message.

### **5. MESSAGE USE**

#### **5.1 Intention**

To eliminate the need to re-enter Air Waybill data which has been already entered by an earlier participant in the movement of a consignment.

To eliminate the need for the paper copy of an air waybill to accompany the consignment in accordance with ICAO Annex 9, Section B, Chapter 4.

#### **5.2 Various cases where a FWB message is used:**

- when a cargo agent delivers a consignment to an airline;
- when an airline transfers a consignment to another airline;
- when an airline delivers a consignment to a handling party;
- when a handling party delivers a consignment to an airline;
- when an airline delivers a consignment to a cargo agent;
- when a participant requests Air Waybill data by a FWR message.

#### **5.3 When to send an automatic FWB message:**

- an unsolicited FWB message must be sent prior to the physical delivery of the goods.

### **6. MESSAGE EXAMPLES**

#### **6.1 This example illustrates an agent to airline message indicating:**

- a minimum charge;
- a declared value for customs (see [Attachment 2](#)).

**6.4** This example illustrates a forwarder to airline message indicating:

- a consolidated consignment, presented on one skid;
- an indication that the agent reports the house waybill details directly to Customs;
- an indication that a local transfer at destination is required;
- application of a Shippers Load and Count (SLAC) for a loaded piece that is not a ULD;
- an indication that the consolidation is secure.(see [Attachment 5](#)).

## 8. MESSAGE NOTES

- FWB1 [Ref. 1.1](#) The corresponding AWB Box Number as shown in Resolution 600a (Extract included as [Attachment 1](#)) and Recommended Practice 1600r is shown in the “AWB Box” Column.
- FWB2 [Ref. 29.](#) Other Customs, Security and Regulatory Control Information  
 The composition of the OCI line depends upon which Customs, Security and Regulatory Control Information Identifier is used and must be in accordance with the [OCI composition rules table below](#).
- FWB20 [Ref. 3.](#) Flight Bookings (only to be used by agreement with carrier to whom FWB Message is addressed).
- FWB21 [Ref. 5.6.4](#) Separator (if [5.6.5](#) included).
- FWB22 [Ref. 5.7.3](#) Separator (if [5.7.4](#) and/or [5.8](#) included).
- FWB23 [Ref. 6.6.4](#) Separator (if [6.6.5](#) included).
- FWB24 [Ref. 6.7.3](#) Separator (if [6.7.4](#) and/or [6.8](#) included).
- FWB25 [Ref. 7.](#) Agent (if Agent entitled to Commission).
- FWB26 [Ref. 7.2.5](#) Separator (if [7.2.6](#) and/or [7.2.8](#) included).
- FWB27 [Ref. 7.2.7](#) Separator (if [7.2.8](#) included).
- FWB29 [Ref. 9.5.4](#) Separator (if [9.5.5](#) included).
- FWB30 [Ref.](#) Separator (if [9.6.4](#) and/or [9.7](#) included).

### [9.6.3](#)

- FWB31 [Ref. 12.10](#) Separator (if any of [12.3](#) thru [12.9](#) included).
- FWB32 [Ref. 5.2](#) Account Detail (only to be used by agreement with Carrier to whom FWB is addressed).
- FWB33 [Ref. 6.2](#) Account Detail (only to be used by Carrier at delivery time).
- FWB34 [Ref. 7.2.8](#) Participant Identifier (only code "CAG" to be used).
- FWB35 [Ref. 8.](#) Special Service Request.  
[Ref. 9.](#) Also Notify.  
[Ref. 18.](#) Other Service Information.  
[Ref. 21.](#) Customs Origin (total characters of [Ref. 8.](#), [Ref. 9.](#), [Ref. 18.](#) and [Ref. 21.](#) cannot exceed 216).
- FWB36 [Ref. 7.2.2](#) Account Number (only to be used by agreement with carrier to whom FWB Message is addressed).
- FWB37 [Ref. 11.5](#) Charge Code (if transmitted by a carrier).
- FWB39 [Ref. 19.](#) CC Charges in Destination Currency (only to be used at delivery time).
- FWB40 [Ref. 5.7](#) Coded Location.  
[Ref. 5.8](#) Contact Detail (total characters of [5.7](#) thru [5.8](#) cannot exceed 69).
- FWB41 [Ref. 6.7](#) Coded Location.  
[Ref. 6.8](#) Contact Detail (total characters of [6.7](#) thru [6.8](#) cannot exceed 69).
- FWB42 [Ref. 9.6](#) Coded Location  
[Ref. 9.7](#) Contact Detail (total characters of [9.6](#) thru [9.7](#) cannot exceed 69).
- FWB43 [Ref. 12.20](#) Separator (if either any of [Ref. 12.11](#) thru [12.18](#) or [12.19](#) included).
- FWB44 [Ref. 12.11](#) Description (to be used for Nature and Quantity of Goods information not covered by [Ref. 12.12](#) thru [12.18](#)).

- FWB45 [Ref. 12.11.3](#) Goods Data Identifier (G).
- FWB46 [Ref. 12.12.3](#) Goods Data Identifier (C).
- FWB47 [Ref. 12.13](#) Dimensions (comprising the greatest length, greatest width and greatest height) (total number of characters of elements [12.13.8](#) thru [12.13.15](#) cannot exceed 20). Not required if ULD number (Ref. [12.15](#)) is included, otherwise must be included if Volume (Ref. [12.14](#)) not included.
- FWB48 [Ref. 12.13.3](#) Goods Data Identifier (D).
- FWB49 [Ref. 12.14.3](#) Goods Data Identifier (V).
- FWB50 [Ref. 12.15.3](#) Goods Data Identifier (U).
- FWB51 [Ref. 12.16.3](#) Goods Data Identifier (S).
- FWB52 [Ref. 12.17.3](#) Goods Data Identifier (H).
- FWB53 [Ref. 12.18.3](#) Goods Data Identifier (O).
- FWB54 [Ref. 20.3](#) Sender Office Message Address (if [20.6](#) not included).
- FWB55 [Ref. 20.4](#) Separator (if [20.5](#) and/or [20.6](#) included).
- FWB56 [Ref. 20.6](#) Sender Participant Identification (if [20.3](#) not included).
- FWB57 [Ref. 22.3](#) No Commission Indication (may be included if Ref. [22.5](#) and [22.7](#) are not included).
- FWB58 [Ref. 22.4](#) Separator (if Ref. [22.5](#) or [22.7](#) included).
- FWB59 [Ref. 22.5](#) Commission Amount (may be included if Ref. [22.3](#) and [22.7](#) are not included).
- FWB60 [Ref. 22.6](#) Separator (if [22.7](#) included).
- FWB61 [Ref. 22.7](#) Commission Percentage (may be included if Ref. [22.3](#) and [22.5](#) are not included).
- FWB62 [Ref.](#) Separator (if [23.5](#) included).

#### [23.4](#)

- FWB63 [Ref.](#) Weight Code  
[12.13.5](#) No AWB Box No. is entered since this information is contained in the universal AWB label and is optional within FWB for internal carrier use to further identify pieces with dimensions.
- FWB64 [Ref.](#) Weight (if [12.13.5](#) included).  
[12.13.6](#)
- FWB65 [Ref.](#) Nominated Handling Party (may be included within FWB but shall not appear on the air waybill).  
[26.](#)
- FWB66 [Ref.](#) Number of Pieces (if AWB Box 22J is empty, where there is not more than one numeric entry in AWB Box 22A, the numeric entry from AWB Box 22A will be used instead).  
[2.3.3](#)
- FWB67 [Ref.](#) Weight (if AWB Box 22K is empty, where there is not more than one entry in AWB Box 22B, the entry from AWB Box 22B will be used instead).  
[2.3.5](#)
- FWB68 [Ref.](#) Reference Number (must be included if [27.5](#) and [27.7](#) not included but may be included with [27.5](#) and/or [27.7](#)).  
[27.3](#)
- FWB69 [Ref.](#) Separator (if [27.5](#) and/or [27.7](#) included).  
[27.4](#)
- FWB70 [Ref.](#) Supplementary Shipment Information (must be included if [27.3](#) and [27.7](#) not included but may be included with [27.3](#) and/or [27.7](#)).  
[27.5](#)
- FWB71 [Ref.](#) Separator (if [27.7](#) included).  
[27.6](#)
- FWB72 [Ref.](#) Supplementary Shipment Information (must be included if [27.3](#) and [27.5](#) not included but may be included with [27.3](#) and/or [27.5](#)).  
[27.7](#)
- FWB73 [Ref.](#) Other Participant Office Message Address (if [28.9](#) not included).  
[28.6](#)
- FWB74 [Ref.](#) Separator (if [28.8](#) or [28.9](#) included).  
[28.7](#)
- FWB75 [Ref.](#) Other Participant Identification (if [28.6](#) not included).  
[28.9](#)
- FWB76 [Ref.](#) Prepaid Charge Summary  
[14.](#)  
[Ref.](#) Collect Charge Summary  
[15.](#) One, or both, of the optional Elements [14](#) or [15](#) must be included.
- FWB77 [Ref.](#) Length Dimension  
[12.13.9](#)  
[Ref.](#) Separator

#### [12.13.10](#)

[Ref.](#) Width Dimension  
[12.13.11](#)

[Ref.](#) Separator  
[12.13.12](#)

[Ref.](#) Height Dimension  
[12.13.13](#)

[Ref.](#) Separator  
[12.13.14](#)

[Ref.](#) Numbers of Pieces must be included if Ref. [12.13.8](#) not = NDA  
[12.13.15](#)

- FWB78 [Ref.](#) Volume  
[12.14](#) No required if ULD number (Ref. [12.15](#)) is included, otherwise must be included if Dimension (Ref. [12.13](#)) not included.
- FWB79 [Ref.](#) Measurement Unit Code  
[12.13.8](#) or  
No Dimensions Available (NDA) must be NDA if ULD (Ref. [12.15](#)) and Volume (Ref. [12.14](#)) are not included and no meaningful (> zero) dimensions are available.
- FWB80 [Ref.](#) Shipper's Load and Count  
[12.16](#) May be included for any unitised piece, not only ULDs.
- FWB81 [Ref.](#) Harmonised Commodity Code  
[12.17](#) May only be included as additional information to the textual cargo description.
- FWB82 [Ref.](#) Other Charge Items  
[13.3](#) The combination of Other Charge Code and Entitlement Code cannot be duplicated (another combination of the same Other Charge Code and the same Entitlement Code is not allowed).
- FWB84 [Ref.](#) Density Group  
[2.5](#) If no Volume Detail included).
- FWB85 [Ref.](#) ISO Country Code  
[29.3](#)
- [Ref.](#) Information Identifier  
[29.5](#)
- [Ref.](#) Customs Information Identifier  
[29.7](#) (At least one of Ref. [29.3](#)., Ref. [29.5](#). or Ref. [29.7](#). must be included).

### 8.8.1 OCI composition rules table

| ISO Country Code | Information Identifier | Customs, Security and Regulatory Control Information Identifier | Explanatory notes on allowed values for the Information Identifier and completion examples. Any Screening Method, Screening Exemption or Security Status codes are to be included in the Supplementary Customs, Security and Regulatory Control Information and not in the Information Identifier.                                                                            |

20

The diagram illustrates the structure of the SENDER REFERENCE and Participant Code fields. The SENDER REFERENCE field is divided into several sections: a 4-bit REF field, a 4-bit Airport/City Code field, a 4-bit Office Function Designator field, a 4-bit Company Designator field, and a 12-bit File Reference field. The Participant Code field is a 16-bit field divided into a 4-bit Participant Identifier field and a 12-bit Participant Code field.

- FZB44 [Ref. 12.11](#) Description (to be used for Nature and Quantity of Goods information not covered by Ref. [12.12](#) thru [12.18](#)).
- FZB45 [Ref. 12.11.3](#) Goods Data Identifier (G).
- FZB46 [Ref. 12.12.3](#) Goods Data Identifier (C).
- FZB47 [Ref. 12.13](#) Dimensions (total number of characters of elements [12.13.5](#) thru [12.13.12](#) cannot exceed 20).
- FZB48 [Ref. 12.13.3](#) Goods Data Identifier (D).
- FZB49 [Ref. 12.14.3](#) Goods Data Identifier (V).
- FZB50 [Ref. 12.15.3](#) Goods Data Identifier (U).
- FZB51 [Ref. 12.16.3](#) Goods Data Identifier (S).
- FZB52 [Ref. 12.17.3](#) Goods Data Identifier (H).
- FZB53 [Ref. 12.18.3](#) Goods Data Identifier (O).
- FZB54 [Ref. 22.6](#) Other Participant Office Message Address (if [22.9](#) not included).
- FZB55 [Ref. 22.7](#) Separator (if [22.8](#) or [22.9](#) included).
- FZB56 [Ref. 22.9](#) Other Participant Identification (if [22.6](#) not included).
- FZB63 [Ref. 12.13.5](#) Weight Code  
No HWB Box No. is entered since this information is contained in the universal HWB label and is optional within FZB for internal forwarder use to further identify pieces with dimensions.
- FZB64 [Ref. 12.13.6](#) Weight (if [12.13.5](#) included).
- FZB68 [Ref. 24.3](#) Reference Number (must be included if [24.5](#) and [24.7](#) not included but may be included with [24.5](#) and/or [24.7](#)).

- FZB69 [Ref. 24.4](#) Separator (if [24.5](#) and/or [24.7](#) included).
- FZB70 [Ref. 24.5](#) Supplementary Shipment Information (must be included if [24.3](#) and [24.7](#) not included but may be included with [24.3](#) and/or [24.7](#)).
- FZB71 [Ref. 24.6](#) Separator (if [24.7](#) included).
- FZB72 [Ref. 24.7](#) Supplementary Shipment Information (must be included if [24.3](#) and [24.5](#) not included but may be included with [24.3](#) and/or [24.5](#)).
- FZB77 [Ref. 12.13.9](#) Length Dimension  
[Ref. 12.13.11](#) Width Dimension  
[Ref. 12.13.13](#) Height Dimension must be zero if Ref. [12.13.8](#) = NDA
- FZB78 [Ref. 12.14](#) Volume  
No required if ULD number (Ref. [12.15](#)) is included, otherwise must be included if Dimension (Ref. [12.13](#)) not included.
- FZB79 [Ref. 12.13.8](#) Measurement Unit Code  
or  
No Dimensions Available (NDA) must be NDA if ULD (Ref. [12.15](#)) and Volume (Ref. [12.14](#)) are not included and no meaningful (> zero) dimensions are available.
- FZB80 [Ref. 25.3](#) ISO Country Code  
[Ref. 25.5](#) Information Identifier  
[Ref. 25.7](#) Customs Information Identifier  
(At least one of Ref. [25.3](#)., Ref. [25.5](#). or Ref. [25.7](#). must be included).
- FZB98 [Ref. 20.4.3](#) Separator (if [20.4.4](#) included).
- FZB99 [Ref. 20.5.3](#) Separator (if [20.5.4](#) included).

### 8.8.1 OCI composition rules table

| ISO Country Code | Information Identifier | Customs, Security and Regulatory | Explanatory notes on allowed values for the Information Identifier and completion examples. Any Screening Method, Screening Exemption or Security Status |

## HOUSE WAYBILL STATUS UPDATE (FZE) MESSAGE

### 1. STANDARD MESSAGE IDENTIFIER = FZE

### 2. MESSAGE FUNCTION

To notify a new status of a specified house waybill consignment.

### 3. MESSAGE APPLICATION

Computer-to-Computer.

### 4. MESSAGE EXCHANGE PARTIES

From: The party facing the change of status.

To: The access address of the cargo control computer of the party needing to be advised of the change of status.

### 5. MESSAGE USE

The format of the FZE Message is the same as the FZD Message except that the FZE Message can only be used for one non-repeatable status.

### 6. MESSAGE EXAMPLES

#### 6.1 Consignment delivered to consignee or his agent.

| Ref. | Message Content                           |
|------|-------------------------------------------|
| 1    | FZE/5                                     |
| 2    | HCD/077-12345675/123456789/BOGNCE/T10K350 |
| 15   | DLV/03NOV1615/NCE/T10K350/MICLARK         |

#### Notes

1. Refer to FZD Message Examples for other FZE Message Examples ([FZD 6.1](#) to [6.14](#), [6.16](#) and [6.18](#) only).
2. Refer to FZD Message Specifications, Notes and Layout for FZE Message Specifications, Notes and Layout.

Following Exceptions apply:

— Note under 2.7 should read:

Ref. [2](#) must be followed by one of the optional Ref. [3](#) to [20](#) possibly with the optional Ref. [22](#).

— Last Note(s) of each Ref. [3](#) to [20](#) do not apply.

3. The FZE Message Type Version Number is the same as the FZD Message Type Version Number.

### 7. FZE MESSAGE SPECIFICATION

## MAIL LABEL DATA (MLD) MESSAGE

### 1. STANDARD MESSAGE IDENTIFIER = MLD

### 2. MESSAGE FUNCTION

To provide bar coded label data for mail receptacles and related information for mail to an airline contracting ground handling services for the mail.

### 3. MESSAGE APPLICATION

Computer-to-Computer/Computer-to-Manual/Manual-to-Computer.

### 4. MESSAGE EXCHANGE PARTIES

From: the party providing ground handling services for mail.

To: the airline contracting the ground handling services for mail.

### 5. MESSAGE USE

The message is designed and intended to be used within an airport environment by parties providing ground handling services to an airline for mail receptacles. These parties are not anticipated to have interfaces with the designated postal operators but do have interfaces with the airlines.

The individual mail label data, journey identifiers and identification of units used for the mail receptacles, e.g. ULD, belly cart, general container, can be included in the message along with the particular status event indication as well as other relevant information, e.g. flights, date/times, locations, airline and designated postal operator identification, etc. This advises the airline contracting the ground services for the mail as to what has occurred with the receptacles.

The airline may then use this information to compose and provide a status update to the appropriate designated postal operator using the conventional Universal Postal Union (UPU) standard EDIFACT Message (RESKIT).

### 6. MESSAGE EXAMPLES

**6.1** A message containing mail label data for receptacles received from a designated postal operator on this date and time at this place.

| Ref. | Message Content                    |

# **SURFACE TRANSPORTATION BOOKING ANSWER (SBA) MESSAGE**

## **1. STANDARD MESSAGE IDENTIFIER = SBA**

## **2. MESSAGE FUNCTION**

To reply to a booking by motor carrier of:

- shipper-to-airport consignment for pickup;
- airport-to-consignee consignment for delivery;
- airport-to-airport pickup and delivery of manifested consignments.

## **3. MESSAGE APPLICATION**

Computer-to-Computer/Manual-to-Computer.

## **4. MESSAGE EXCHANGE PARTIES**

From: Motor Carrier.  
To (Computer): Airline or Air Forwarder.

## **5. MESSAGE USE**

—

## **6. MESSAGE EXAMPLES**

**6.1** Confirmation by surface transport provider to pickup from the shipper House Waybill consignment associated with a Master Air Waybill.

## 8. MESSAGE NOTES

SBR1 [Ref. 1.](#) — Updating Principles

- (a) Amendments permitted are shown in Table 8.3[SBR](#).
- (b) The content of Ref. [2](#), [3](#), [5](#), [6](#), [8](#), [9](#), [10](#), [11](#), [12](#), [13](#), [14](#) and [15](#) shall override the existing booking information.
- (c) The only change permitted to Ref. [4](#) — Flight Information is to Ref. [4.11](#) — Space Allocation Code.
- (d) In case of deletion of all SSR, OSI, SPI, SHP, SDI, CNE, CVD, PPD, COL and SRI information the SSR, OSI, SPI, SHP, SDI, CNE, CVD, PPD, COL and SRI lines will be limited to the line identifier only.

SBR20 [Ref. 2.3](#) Manifest Identification (must be included if [2.5](#) and [2.7](#) not included but may be included with [2.5](#) and/or [2.7](#)).

SBR21 [Ref. 2.4](#) Separator (if [2.5](#) or [2.7](#) included).

SBR22 [Ref. 2.5](#) AWB Identification (must be included if [2.3](#) and [2.7](#) not included but may be included with [2.3](#) and/or [2.7](#)).

SBR23 [Ref. 2.6](#) Separator (if [2.7](#) included).

SBR24 [Ref. 2.7](#) HWB Identification (must be included if [2.3](#) and [2.5](#) not included but may be included with [2.3](#) and/or [2.5](#)).

SBR25 [Ref. 3.](#) Consignment Details (for [2.7](#) if included; for [2.5](#) if included without [2.7](#); for [2.3](#) if included without [2.5](#) and [2.7](#)).

SBR26 [Ref. 4.3](#) Flight Details (if [4.5](#) not included).

SBR27 [Ref. 4.5](#) Substitute Flight Details (if [4.3](#) not included).

SBR28 [Ref. 4.11](#) Space Allocation Code  
Only the following Space Allocation Action Codes may be used:

- NA Requesting Space Allocation, if Not Available Will  
— Accept Alternative;
- NN Requesting Space Allocation, Will Not Accept  
— Alternative;
- SS Reporting Sale;

—  
XX Cancel Any Previous Space Allocation.  
—

- SBR29 [Ref. 7.3](#) Requesting Office Message Address (if [7.6](#) not included).
- SBR30 [Ref. 7.4](#) Separator (if [7.5](#) or [7.6](#) included).
- SBR31 [Ref. 7.6](#) Requesting Participant Identification (if [7.3](#) not included).
- SBR32 [Ref. 8.](#) Surface Pickup Information (if [2.3](#) and 10 not included).
- SBR33 [Ref. 8.9](#) Service Code.  
[Ref. 10.9](#) Service Code  
Only the following Service Codes may be used:  
D Door-to-Door Service;  
—  
S Substitute Truck.  
—
- SBR34 [Ref. 9.](#) Shipper Name and Address (if [8](#) included).
- SBR35 [Ref. 9.5.4](#) Separator (if [9.5.5](#) included).
- SBR36 [Ref. 9.6](#) Coded Location.  
[Ref. 9.7](#) Contact Detail  
(total characters of [9.6](#) through [9.7](#) cannot exceed 69).
- SBR37 [Ref. 9.6.3](#) Separator (if [9.6.4](#) and/or [9.7](#) included).
- SBR38 [Ref. 10.](#) Surface Delivery Information (if [2.3](#) and [8](#) not included).
- SBR39 [Ref. 11.](#) Consignee Name and Address (if [10](#) included).
- SBR40 [Ref. 11.5.4](#) Separator (if [11.5.5](#) included).
- SBR41 [Ref. 11.6](#) Coded Location.  
[Ref. 11.7](#) Contact Detail (total characters of [11.6](#) through [11.7](#) cannot exceed 69).

- SBR42 [Ref. 11.6.3](#) Separator (if [11.6.4](#) and/or [11.7](#) included).
- SBR43 [Ref. 13.](#) Prepaid Charge Summary (may be included if [8](#) included).
- SBR44 [Ref. 14.](#) Collect Charge Summary (may be included if [10](#) included).
- SBR45 [Ref. 15.3](#) Reference Number (must be included if [15.5](#) and [15.7](#) not included but may be included with [15.5](#) and/or [15.7](#)).
- SBR46 [Ref. 15.4](#) Separator (if [15.5](#) and/or [15.7](#) included).
- SBR47 [Ref. 15.5](#) Supplementary Shipment Information (must be included if [15.3](#) and [15.7](#) not included but may be included with [15.3](#) and/or [15.7](#)).
- SBR48 [Ref. 15.6](#) Separator (if [15.7](#) included).
- SBR49 [Ref. 15.7](#) Supplementary Shipment Information (must be included if [15.3](#) and [15.5](#) not included but may be included with [15.3](#) and/or [15.5](#)).

# **SURFACE TRANSPORTATION PLANNING CANCELLATION (SPX) MESSAGE**

## **1. STANDARD MESSAGE IDENTIFIER = SPX**

## **2. MESSAGE FUNCTION**

To cancel a requested or confirmed terminal slot for a motor carrier to pickup or deliver consignments.

## **3. MESSAGE APPLICATION**

Computer-to-Computer/Computer-to-Manual/Manual-to-Computer.

## **4. MESSAGE EXCHANGE PARTIES**

From: the party requesting or holding the terminal slot.

To: the party providing the terminal slot.

## **5. MESSAGE USE**

—

## **6. MESSAGE EXAMPLES**

### **6.1 Indication that a requested terminal slot is no longer required.**

| <b>Ref.</b> | <b>Message Content</b>                                       |

# **SURFACE TRANSPORTATION STATUS UPDATE (SSU) MESSAGE**

## **1. STANDARD MESSAGE IDENTIFIER = SSU**

## **2. MESSAGE FUNCTION**

To provide an airline or air forwarder with a change of status for a consignment moved by surface transport.

## **3. MESSAGE APPLICATION**

Computer-to-Computer/Manual-to-Computer.

## **4. MESSAGE EXCHANGE PARTIES**

From: Motor Carrier.

To: Airline or Air Forwarder.

## **5. MESSAGE USE**

—

## **6. MESSAGE EXAMPLES**

**6.1** Advice from a surface transport provider that a House Waybill consignment associated with a Master Air Waybill has been picked-up at the shipper's door (received from shipper).

# GENERAL STATUS ANSWER (STA) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = STA

## 2. MESSAGE FUNCTION

To provide the various status information requested by a General Status Request (STR) message which includes:

- the latest status for a nominated consignment(s);
- all the statuses attained (history) for a nominated consignment;
- the latest status for all consignments expected to depart from a particular station to a specific destination on a specific date and belonging to the requesting party.

## 3. MESSAGE APPLICATION

Computer-to-Computer/Computer-to-Manual/Manual-to-Manual.

## 4. MESSAGE EXCHANGE PARTIES

From (Computer): the airline's computer, warehouse operator, or handling agent replying to the request for status information.

From (Manual): the airline, warehouse operator, or handling agent to which the General Status Request (STR) was addressed.

To (Computer): the access address of the cargo computer system from which the General Status Request (STR) was sent, e.g. forwarder.

To (Manual) the office, e.g. freight forwarder, who initialised the request.

## 5. MESSAGE USE

—

## 6. MESSAGE EXAMPLES

**6.1** A response to a General Status Request for consignments expected to depart from a particular station for a specific destination indicating one consignment manifested on a specific flight and another consignment delivered to a consignee or his agent.

| Ref. | Message Content                |
|------|--------------------------------|

# **SURFACE TRANSPORTATION MOVEMENT (STM) MESSAGE**

## **1. STANDARD MESSAGE IDENTIFIER = STM**

## **2. MESSAGE FUNCTION**

To record Road Feeder Service (RFS) movements including:

- scheduled, estimated, actual departures and delayed departures;
- arrivals;
- indefinite delayed departures;
- supplementary information.

## **3. MESSAGE APPLICATION**

Computer-to-Computer, Computer-to-Manual, Manual-to-Computer, Manual-to-Manual.

## **4. MESSAGE EXCHANGE PARTIES**

From: the carrier's control office, local office, the RFS provider, or other interested parties, e.g. Cargo Community System.

To: the carrier's control office, downline station, RFS provider or other interested parties, e.g. Cargo Community System.

## **5. MESSAGE USE**

The STM message is sent whenever a RFS movement or planned movement needs to be recorded, including at truck departure, arrival expected departure or when further information is known.

## **6. MESSAGE EXAMPLES**

### **6.1 Estimated departure message.**

| <b>Ref.</b> | <b>Message Content</b>           |
|-------------|----------------------------------|
| 1           | STM/2                            |
| 2           | SFI/CV9013/12SEP/AW022/HAM       |
| 3           | SVD/ED12SEP/2015/EA13SEP0600/LUX |

### **6.2 Actual departure message.**

| <b>Ref.</b> | <b>Message Content</b>               |
|-------------|--------------------------------------|
| 1           | STM/2                                |
| 2           | SFI/CV9013/12SEP/AW022/HAM           |
| 3           | SVD/AD12SEP2000/2015/EA13SEP0600/LUX |

### 6.3 Departure message including actual delay information.

| Ref. | Message Content                                            |
|------|------------------------------------------------------------|
| 1    | STM/2                                                      |
| 2    | SFI/CV9013/12SEP/AW022/HAM                                 |
| 3    | SVD/AD12SEP2025/0015/EA13SEP1115/LUX<br>/DL23/41/0025/0350 |
| 7    | OSI/TRUCK ENGINE PROBLEM                                   |

### 6.4 Arrival message indicating the arrival time of the vehicle and the arrival time of the documentation.

| Ref. | Message Content              |
|------|------------------------------|
| 1    | STM/2                        |
| 2    | SFI/CV9012/10SEP/BITKS12/HAM |
| 4    | SVA/AA11SEP0915/0925         |

### 6.5 Definite delay message including delay reason.

| Ref. | Message Content            |
|------|----------------------------|
| 1    | STM/2                      |
| 2    | SFI/CV9013/12SEP/AW022/HAM |
| 5    | SVL/ED12SEP2335<br>/DL41   |

### 6.6 Indefinite delay message including supplementary explanation.

| Ref. | Message Content                           |
|------|-------------------------------------------|
| 1    | STM/2                                     |
| 2    | SFI/CV9013/12SEP/AW022/HAM                |
| 6    | SVN/NI13SEP0900                           |
| 7    | OSI/TRUCK CAN ONLY BE REPAIRED IN MORNING |

# GENERAL STATUS REQUEST (STR) MESSAGE

## 1. STANDARD MESSAGE IDENTIFIER = STR

## 2. MESSAGE FUNCTION

To request various status information concerning consignments. This information includes:

- the latest status for a nominated consignment(s);
- all the statuses attained (history) for a nominated consignment;
- the latest status for all consignments expected to depart from a particular station to a specific destination on a specific date and belonging to the requesting party.

## 3. MESSAGE APPLICATION

Computer-to-Computer/Computer-to-Manual.

## 4. MESSAGE EXCHANGE PARTIES

From (Computer): the party, e.g. forwarder, requesting the consignment status information.

To (Computer): the access address of the airline's computer, warehouse operator, or handling agent controlling the movement of the consignments.

To (Manual): the station or transshipment point of the airline, warehouse operator or handling agent.

## 5. MESSAGE USE

—

## 6. MESSAGE EXAMPLES

**6.1** A request for the latest statuses of all consignments expected to depart from a station for a specific destination on a particular day.

| Ref. | Message Content          |
|------|--------------------------|
| 1    | STR/2                    |
| 3    | SLC/21JAN/SYDHKG         |
| 4    | REF//AGT/02320011234/SYD |

**6.2** A request for the latest status of a single consignment.

| Ref. | Message Content  |
